Business Arising

# Correspondence

# Reports & Presentations

## AGL Update

AGL presented its FY19 results:

- Underlying Profit after tax \$1,040m
- Further \$2b of developments, focused on storage and flexible generation
- Acquisition of gas generation and business customer retailer Perth Energy
- Extension of AGL Safety Net rewards loyalty for residential and small business gas customers. Almost 140,000 residential gas customers will receive a five percent discount, providing an average saving of between \$44 and \$80 including GST per year. More than 6,000 small business gas customers will receive a five percent discount, providing an average saving of between \$122 and \$317 including GST per year.

# Reports & Presentations

## AGL Update

Blake Collins, Production Operator at Camden, received the Ovation Award – highest acknowledgment under AGL’s Energise employee recognition program – from CEO and MD Brett Redman.

On 14 December 2018, Blake rescued a child, a man and a woman from a car accident right before their crashed van caught on fire during a severe thunderstorm near the junction of the Dairy on Cawdor Rd.

Blake then performed first aid to the child, whose head was bleeding profusely, ensured that the man and woman were not in shock, and called 000. The fire brigade and ambulance arrived minutes later, and the family was taken to the hospital.

# Operations & Environment

## Decommissioning & Rehabilitation

Since June 2019, AGL completed decommissioning activities at Menangle Park 05 (MP05), Elizabeth Macarthur 34 (EM34) and 22 (EM22) wells and is currently decommissioning Sugar Loaf 09 (SL09). Surface rehabilitation of sites is continuing.

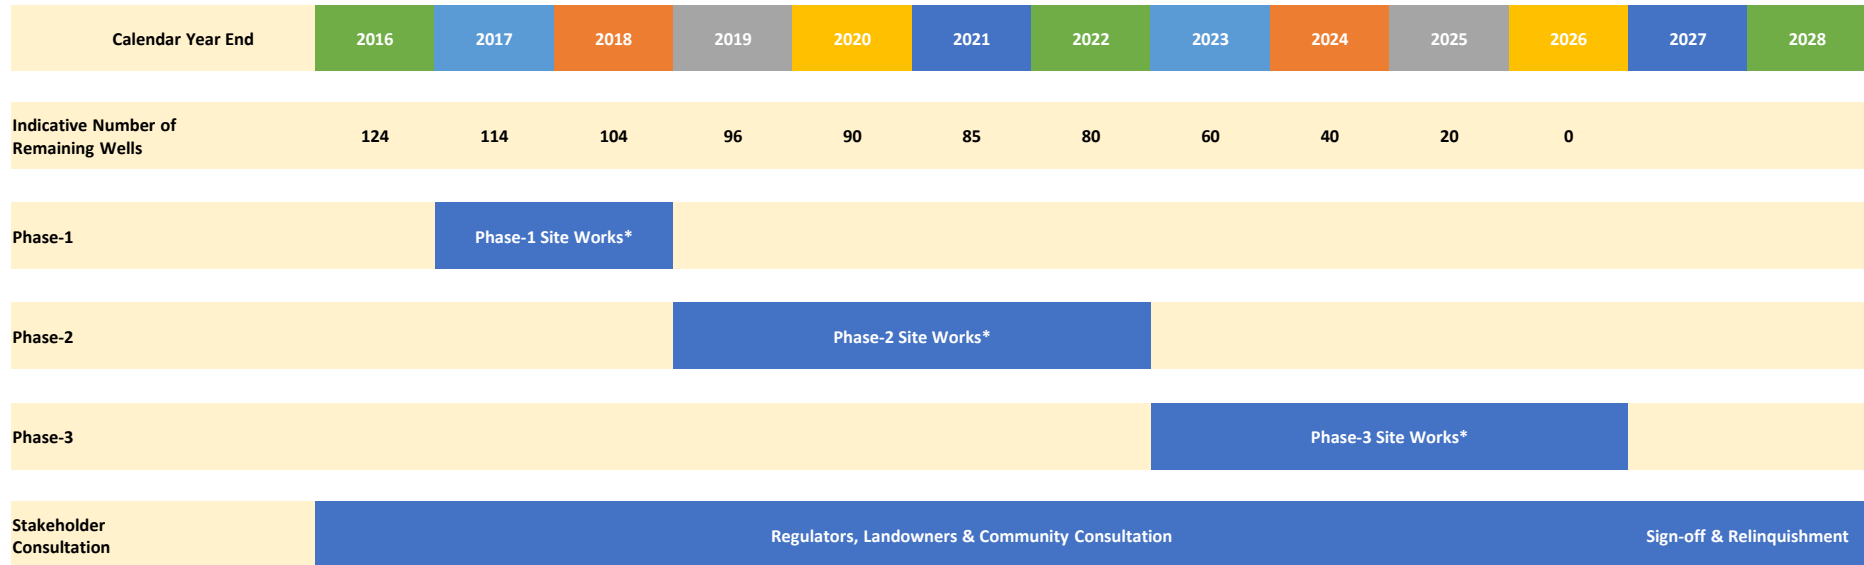

Production Well Status	Total (as at 30 June 2019)	Total (as at 11 Sep 2019)
Drilled (total wells)	144	144
Production and dewatering wells	87	87
Suspended or shut in wells	11	10
Wells in process of decommissioning	1 (MP05) 2 (EM34 & SL09 initial works completed)	1 (SL09)
Wells subsurface decommissioning complete	43 (additional since last time EM21)	46 (additional since last time EM22, EM34, MP05)
Land in process of being rehabilitated	10 (EM21, EM28, EM31, EM32, EM33, RP02, RP03, RP04, RP05, RP12)	13 (EM21, EM22, EM28, EM31, EM32, EM33, EM34, MP05, RP02, RP03, RP04, RP05, RP12)
Land fully rehabilitated and returned to landowner	33 (additional since last time LP01, MT05, WG06)	33

# Operations & Environment

## Decommissioning & Rehabilitation – Whole Project Timeline

### Camden Rehabilitation Project - Whole Project Projected Preliminary Timeline

\* After site works are complete, wait on regeneration of surface compatible with required land use, and regulatory sign-off - may take an additional 12-24 months

# Operations & Environment

Decommissioning & Rehabilitation – Video

# Operations & Environment

## Compliance monitoring

- RPPG **quarterly noise monitoring** was completed in June. All results were compliant with noise limits. No noise complaints were received during the last quarter.
- RPPG **quarterly air emissions monitoring** was completed in September. The quarterly air emissions report has not yet been received.
- Our **annual leak detection program** will be performed in during September/October for all plant and field equipment including gathering lines.
- Recent EPA **LDAR** testing returned no actions and/or leaks on 20 wells.
- The annual review and update of the **Environmental Management Plan and Sub Plans** was completed. The latest versions are available on the Camden Gas Project website.
- AGL has engaged Biosis Pty Ltd to undertake an **Aboriginal Cultural Heritage Assessment** on proposed upgrades to existing internal access roads on the Wandinong property. In August Biosis, on behalf of AGL submitted the Aboriginal Heritage Impact Permit application to collect and relocate artifacts. AGL is currently awaiting approval from the Office of Environment and Heritage to proceed.

# Operations & Environment

## 6-month outlook

During the next 6 months, we will prioritise workover well maintenance to improve production from Camden Gas Operations for AGL's Customers.

- Workover well maintenance
  - A number of wells will be visited by AGL Rig-1 to perform maintenance work to improve gas production.
  - We have recently worked over a well at Glen Lee, and will continue workovers including wells at Sugar Loaf, Mount Taurus, Spring Farm and Menangle Park. This generally involves cleaning out the wellbore and, where required, reinstalling pumps.
- Well decommissioning
  - When workovers are not required, we will continue to progressively decommission wells as they reach end of life.
  - Earlier this year we decommissioned EM28, and we are currently decommissioning EM21.
  - Our work continues to be overseen by our government regulators – EPA Gas Regulation Branch and DPE Resources Regulator.
  - We will add more decommissioning wells to our schedule as our work programs are approved by these regulatory agencies.

# Land & Approvals

AGL continues to regularly communicate with landowners regarding access to well sites for planned workover maintenance and decommissioning activities on the land. Consultation occurs regarding surface rehabilitation of well sites once decommissioning of the well is complete.

- Additional Updates
  - Works were recently undertaken to move the storage facility from Logan Brae Dairy yard to a new storage facility at Glen Lee. Works will now commence rehabilitating the area and handing back to the landowner.

# Community & Stakeholders

# Community & Stakeholders

Completed LCIP initiatives

AGL and My Gateway distributing toolboxes to students of Camden High School.

AGL and Rotary Club of Camden, funding the purchase of teaching aids for students with disabilities at Yandelora School.

### Meet our new crossword and sudoku author

It was a simple idea when he first came up with the concept. He wanted to create a crossword puzzle book that would be both fun and educational. He decided to write a book that would help people learn about the local area while they were solving puzzles. He called it 'The Local Area Crossword and Sudoku Book'. He has been working on it for several months and is now ready to launch it. He is excited to share it with the community and hopes it will be a success.

**Household help to save water and cost**

GREATER Sydney residents looking to improve water efficiency in their homes can take advantage of Sydney Water's subsidised plumbing program. A \$6 million boost to their WaterFix program was announced last month as part of a \$200 million program to support the construction of Level 1 water recycling. Residents in Sydney, the Blue Mountains and the Illawarra can use the program to repair up to three minor indoor tap leaks for as little as \$30. The program also covers up to three minor outdoor tap leaks for up to \$200. The program is available to residents in Sydney, the Blue Mountains and the Illawarra. It is a great way to save water and money. For more information, visit [www.sydneywater.nsw.gov.au](http://www.sydneywater.nsw.gov.au).
