Monday, 25 August 2014

Dear Shareholder,

On behalf of AGL, I am pleased to invite you to participate in a 1 for 5 fully underwritten pro rata accelerated renounceable entitlement offer of New Shares (with entitlement trading) at an offer price of \$11.00 per New Share (**Offer Price**) to raise gross proceeds of approximately \$1.2 billion (**Entitlement Offer**).

The proceeds of the Entitlement Offer will be used to fund part of the purchase price for the acquisition of the Macquarie Generation (**MacGen**) assets from the New South Wales (**NSW**) Government for consideration of \$1,505 million as announced to ASX by AGL on 12 February 2014, and subsequently authorised by the Australian Competition Tribunal on 25 June 2014.

MacGen acquisition

The MacGen assets comprise:

- > Bayswater (2,640 MW) and Liddell (2,000 MW) power stations;
- > Hunter Valley Gas Turbines (50 MW), Bayswater B and Tomago development sites, Liddell solar farm;
- > Extensive coal handling infrastructure comprising rail unloaders and conveyor systems; and
- > 104 Mt of low cost contracted coal and approximately 4.2 Mt opening coal stockpile.

This acquisition is entirely consistent with AGL's integrated strategy. MacGen is the largest electricity generator in NSW and has the lowest short run marginal cost of large baseload power stations in the State. The acquisition increases AGL's registered generation capacity to approximately 10,400 MW² and will result in AGL having the lowest cost large scale baseload generation in both Victoria and NSW.

Notes:

- 2 Includes approximately 150 MW of generation under construction including AGL Solar.
- 3 Please refer to the AGL Investor Presentation included in Section 4 of this Retail Offer Booklet for further information on the key underlying assumptions.
- 4 TERP is the theoretical price at which AGL Shares should trade immediately after the ex-date for the Entitlement Offer. TERP is a theoretical calculation only and the actual price at which AGL Shares trade immediately after the ex-date for the Entitlement Offer will depend on many factors and may not be equal to TERP. TERP is calculated by reference to AGL's closing price on 19 August 2014 and is adjusted for the 2014 final dividend of 33.0 cents per share.

In addition to enhancing AGL's vertical integration strategy, the acquisition is expected to be accretive to underlying EPS for the year ending 30 June 2015³.

Entitlement Offer

Under the Entitlement Offer, eligible shareholders are entitled to acquire 1 New Share for every 5 existing AGL ordinary shares (**Shares**) held on the record date, being 7.00pm (Sydney time) on Monday 25 August 2014. The Board considers that the pro rata nature of the Entitlement Offer favours existing AGL shareholders in recognition of their continuing support.

The Offer Price of \$11.00 per New Share represents a discount of 23% to the closing market price of Shares on 19 August 2014, the day before the Entitlement Offer was announced, and a 20% discount to the theoretical ex-rights price (**TERP**)⁴.

New Shares issued under the Entitlement Offer will rank equally with existing Shares. The first dividend payable in respect of the New Shares will be the 2015 interim dividend expected to be declared as part of AGL's interim results announcement for the six months ending 31 December 2014. New Shares to be issued under the Offer will not be entitled to the 2014 final dividend announced on 20 August 2014.

The Entitlement Offer comprises an institutional component (**Institutional Entitlement Offer**) and the Retail Entitlement Offer. The Institutional Entitlement Offer and associated bookbuild have raised approximately \$515 million in total.

The Retail Entitlement Offer and associated retail bookbuild (described below) is expected to raise approximately \$717 million. This Retail Offer Booklet relates to the Retail Entitlement Offer and entitlements allotted under it (**Retail Entitlements**).

Accompanying this Retail Offer Booklet is your personalised Entitlement and Acceptance Form which contains details of your Entitlement. Your Entitlement may have value and it is important that you determine whether to take up, sell or do nothing in respect of your Entitlement (see Section 3).

The Retail Entitlement Offer closes at 5.00pm (Sydney time) on Monday, 15 September 2014. To participate, you need to ensure that you have completed your application by paying Application Monies by Bpay®, or by lodging your Entitlement and Acceptance Form with your Application Monies paid by cheque, so that they are received before this time in the manner described in this Retail Offer Booklet.

If you do not wish to take up your Entitlement, you may sell all or part of your Entitlement on the ASX from Monday, 25 August 2014 to Monday, 8 September 2014 or transfer all or part of your Entitlement directly to another person. The assignment, transfer and exercise of Retail Entitlements is restricted to persons meeting certain eligibility criteria, as described in Section 6.1. If holders of Retail Entitlements at the end of the trading period do not meet the eligibility criteria, they will not be able to exercise the Retail Entitlements and, as a result, they may receive no value for them. If you choose to do nothing in respect of all or part of your Entitlement, part or all (as applicable) of your Entitlement will be offered for sale for your benefit through a bookbuild process on Thursday, 18 September 2014 (**Retail Shortfall Bookbuild**). In this case, you will receive any amount paid above the Offer Price in respect of the Retail Entitlements sold to investors in the Retail Shortfall Bookbuild (**Retail Premium**), less any applicable withholding tax.

It is the current intention of the AGL Directors who hold shares to participate in the Entitlement Offer.

Further Information

Further information on the Retail Entitlement Offer and AGL's business is detailed in this Retail Offer Booklet. You should carefully read this Retail Offer Booklet in its entirety and consult your financial adviser before making your investment decision. In particular, you should read and consider the 'Key Risks' section of the AGL Investor Presentation included in Section 4 of this Retail Offer Booklet which contains a summary of some of the key risks associated with an investment in AGL.

On behalf of the AGL Board, I encourage you to consider this opportunity to participate in the continuing growth of AGL.

Yours faithfully,

Jeremy Maycock, Chairman
AGL Energy Limited

Ineligible Retail Shareholders will receive the Retail Premium (if any), less any applicable withholding tax, for the sale of Entitlements by a nominee for their benefit through the Retail Shortfall Bookbuild.

You may incur brokerage costs if you sell all or part of your Entitlement on ASX. > For Eligible Retail Shareholders who hold their existing Shares on capital account, the proceeds of any sale of your Entitlements should be treated as capital gains for Australian tax purposes (see Section 4.2). > If you sell your Entitlements in the Retail Entitlement trading period, you may receive a higher or lower amount than a shareholder who sells their Entitlements at a different time in the Retail Entitlement trading period or through the Retail Shortfall Bookbuild. > If you only sell or transfer part of your Entitlement, you may choose to take up the remainder (see Option 1 above) or you may do nothing and let that part be sold in the Retail Shortfall Bookbuild (see Option 3 below).

Options available to you	Key considerations
Do nothing and let all or part of your Entitlement be sold through the Retail Shortfall Bookbuild	<ul style="list-style-type: none"> <li data-bbox="445 338 1493 450">> To the extent you do not take up or do not sell all of your Entitlement on ASX (or via direct transfer), your Entitlements will be sold through the Retail Shortfall Bookbuild on Thursday, 18 September 2014 and you will receive any Retail Premium in respect of these Entitlements (see Section 3.5.4). There is no guarantee that there will be any Retail Premium. <li data-bbox="445 461 1493 600">> The Australian Taxation Office (ATO) has stated in Taxation Ruling TR 2012/1 that in certain circumstances retail premiums will be taxed either as unfranked dividends (which may be subject to dividend withholding tax if you are not an Australian resident shareholder) or as ordinary income (and not as capital gains). The ATO's ruling does not apply to the Entitlements because, amongst other things, the Entitlements are tradeable on ASX. <li data-bbox="445 611 1493 723">> AGL's tax adviser considers that any Retail Premium should be taxable in the hands of Eligible Retail Shareholders who hold their existing Shares on capital account as a capital gain (see Section 4.3). However, it is possible the ATO could seek to apply the tax treatment specified in Taxation Ruling TR 2012/1 to Entitlements sold via the Retail Shortfall Bookbuild. <li data-bbox="445 734 1493 815">> Accordingly, Eligible Retail Shareholders who propose to allow their Entitlements to be sold into the Retail Shortfall Bookbuild should consider instead selling their Entitlements on ASX, the tax treatment for which is more certain (see Section 4.2). <li data-bbox="445 826 1493 855">> You will not incur brokerage costs on any Retail Premium received from the Retail Shortfall Bookbuild. <li data-bbox="445 866 1493 978">> By letting your Entitlement be sold through the Retail Shortfall Bookbuild, you will forgo any exposure to increases or decreases in the value of New Shares (or any value for that Entitlement which may have been achieved through its sale on ASX or otherwise). Your percentage shareholding in AGL will also be diluted. <li data-bbox="445 990 1493 1133">> AGL may be required to withhold tax, if you are an Australian tax resident shareholder, and you have not previously provided your TFN or ABN to AGL. Accordingly, you may wish to do so prior to the close of the Retail Entitlement Offer to ensure that withholding tax is not deducted from any Retail Premium at the current rate of 49%. You are able to provide your TFN or ABN online with the AGL Share Registry at www.linkmarketservices.com.au.

3.1 Overview of the Entitlement Offer

Eligible shareholders are being offered the opportunity to purchase 1 New Share for every 5 existing Shares held as at 7.00pm (Sydney time) on Monday, 25 August 2014 (**Record Date**), at the Offer Price of \$11.00 per New Share.

The Entitlement Offer is comprised of four components:

- (a) **Institutional Entitlement Offer** – Eligible Institutional Shareholders (as defined in Section 6.2) were given the opportunity to take up all or part of their Entitlement. Entitlements under the Institutional Entitlement Offer (**Institutional Entitlements**) were renounceable and were not able to trade on ASX;
- (b) **Institutional Shortfall Bookbuild** – Institutional Entitlements not taken up and Entitlements of ineligible institutional shareholders were sold through a bookbuild process on Friday, 22 August 2014 (**Institutional Shortfall Bookbuild**). The premium paid in respect of those Entitlements was \$2.85 per Entitlement (**Institutional Premium**). Eligible institutional shareholders who elected not to take up all or part of their Institutional Entitlements, and ineligible institutional shareholders, will receive the Institutional Premium for each entitlement that was not taken up and that was sold into the Institutional Shortfall Bookbuild.
- (c) **Retail Entitlement Offer** – Eligible Retail Shareholders (as defined in Section 6.1) will be allotted Retail Entitlements under the Retail Entitlement Offer (**Retail Entitlement**) which can be taken up in whole or in part, or traded on ASX (or transferred directly to another person) in whole or in part. This means that if you do not wish to take up all or part of your Entitlement you may sell on ASX or transfer all or part of your Entitlement in order to realise value from your Entitlement. You may incur brokerage costs if you sell your Entitlement on ASX; and
- (d) **Retail Shortfall Bookbuild** – Retail Entitlements which are not taken up by the close of the Retail Entitlement Offer and Entitlements of Ineligible Retail Shareholders (as defined in Section 3.6) will be sold through the Retail Shortfall Bookbuild. Any Retail Premium will be remitted proportionally to holders of those Retail Entitlements at the close of the Retail Entitlement Offer, and to Ineligible Retail Shareholders. The Retail Premium, if any, is expected to be paid on or about Monday, 29 September 2014.

You have a number of decisions to make in respect of your Entitlement. These decisions may materially affect the value (if any) that may be received in respect of your Entitlement. You should read this Retail Offer Booklet carefully before making any decisions in relation to your Entitlement.

The Entitlement Offer is fully underwritten by the Underwriters. Further details on the Retail Entitlement Offer and Retail Shortfall Bookbuild are set out below.

3.2 The Retail Entitlement Offer

Under the Retail Entitlement Offer, Eligible Retail Shareholders are invited to apply for 1 New Share for every 5 existing Shares held as at the Record Date at the Offer Price of \$11.00 per New Share.

The offer ratio and Offer Price under the Retail Entitlement Offer are the same as for the Institutional Entitlement Offer.

The Retail Entitlement Offer opens at 9.00am (Sydney time) Tuesday, 26 August 2014 and will close at 5.00pm (Sydney time) on Monday, 15 September 2014.

3.3 Your Entitlement

Your Entitlement is set out on the accompanying personalised Entitlement and Acceptance Form and has been calculated as 1 New Share for every 5 existing Shares you held as at the Record Date. If the result is not a whole number, your Entitlement will be rounded up to the nearest whole number of New Shares.

If you have more than one registered holding of Shares, you will be sent more than one personalised Entitlement and Acceptance Form and you will have a separate Entitlement for each separate holding.

You can also view details of your Entitlement online at www.agl.com.au.

New Shares issued under the Retail Entitlement Offer will be fully paid and rank equally in all respects with existing Shares and will be entitled to dividends on the same basis as existing Shares, starting with the 2015 interim dividend. New Shares to be issued under the Offer will not be entitled to the 2014 final dividend announced on 20 August 2014.

See Sections 6.1 and 6.14 for information on restrictions on participation.

3.4 Consider the Retail Entitlement Offer carefully in light of your particular investment objectives and circumstances

The Retail Entitlement Offer is being made pursuant to provisions of the Corporations Act which allow entitlement offers to be made without a prospectus. This Retail Offer Booklet does not contain all of the information which may be required in order to make an informed decision regarding an application for New Shares offered under the Retail Entitlement Offer. As a result, it is important for you to read carefully and understand the information on AGL and the Retail Entitlement Offer made publicly available, prior to deciding whether to take up all or part of your Entitlement, sell or transfer all or part of your Entitlement or do nothing in respect of your Entitlement. In particular, please refer to this Retail Offer Booklet and other announcements made available at www.agl.com.au (including announcements which may be made by AGL after publication of this Retail Offer Booklet).

Please consult with your stockbroker, accountant or other professional adviser if you have any queries or are uncertain about any aspect of the Retail Entitlement Offer. You should also refer to the 'Key risks' section of the AGL Investor Presentation included in Section 5 of this Retail Offer Booklet.

3.5 Options available to you

If you are an Eligible Retail Shareholder, you may take any of the following actions. Each of these options may have a materially different outcome on any value you receive in respect of your Entitlement.

- > Take up all or part of your Entitlement (see Section 3.5.1);
- > Sell all or part of your Entitlement to persons meeting certain eligibility criteria;
 - on ASX (see Section 3.5.2); or
 - by transferring it directly to another person (see Section 3.5.3)
- > Do nothing and let your Entitlement be sold through the Retail Shortfall Bookbuild (see Section 3.5.4)

3.5.1 If you wish to take up all or part of your Entitlement

If you wish to take up all or part of your Entitlement, please either:

- (1) complete and return the personalised Entitlement and Acceptance Form with the requisite Application Monies;
- (2) pay your Application Monies via Bpay® by following the instructions set out on the personalised Entitlement and Acceptance Form; or
- (3) apply and pay online at www.agl.com.au,

in each case, by no later than 5.00pm (Sydney time) on Monday, 15 September 2014.

If you take up and pay for all or part of your Entitlement before the close of the Retail Entitlement Offer, it is expected that you will be issued New Shares on Thursday, 25 September 2014. AGL's decision on the number of New Shares to be issued to you will be final.

AGL also reserves the right (in its absolute discretion) to reduce the number of New Shares issued (or any Retail Premium paid to Eligible Retail Shareholders, or persons claiming to be Eligible Retail Shareholders), if AGL believes their claims to be overstated or if they or their nominees fail to provide information to substantiate their claims to AGL's satisfaction (see Section 6.6).

Eligible Retail Shareholders are not able to apply for New Shares in excess of their Entitlement as set out in their personalised Entitlement and Acceptance Form.

3.5.2 If you wish to sell all or part of your Entitlement on ASX

If you wish to sell all or part of your Entitlement on ASX, you should instruct your stockbroker and provide details as requested from your personalised Entitlement and Acceptance Form or as accessed online at www.agl.com.au. Allow sufficient time for your instructions to be carried out by your stockbroker. Please note you may incur brokerage if you choose to sell your Entitlement on ASX.

Entitlement trading on ASX starts on a deferred settlement basis at 10.00am (Sydney time) on Monday, 25 August 2014 (ASX code: AGKRA) and ceases at 4.00pm (Sydney time) on Monday, 8 September 2014. There is no guarantee that there will be a liquid market in traded Entitlements. A lack of liquidity may impact your ability to sell your Entitlement on ASX and the price you may be able to achieve.

This Retail Offer Booklet, along with your personalised Entitlement and Acceptance Form, will be despatched on Friday, 29 August 2014.

AGL will have no responsibility and disclaims all liability (to the maximum extent permitted by law) to you if you trade your Entitlement before the Retail Entitlements are allotted, or before you receive your personalised Entitlement and Acceptance Form, whether on the basis of confirmation of the allocation provided by AGL or the AGL Share Registry or failure to maintain your updated details on the AGL share registry or otherwise.

If you wish to sell part of your Entitlement on ASX and let the balance be sold into the Retail Shortfall Bookbuild, follow the procedures above in respect of the part of your Entitlement you wish to sell on ASX, and do nothing in respect of the balance. You will receive the Retail Premium (if any) in respect of those Entitlements sold through the Retail Shortfall Bookbuild.

Prices obtainable for Retail Entitlements may rise and fall over the Retail Entitlement trading period and will depend on many factors including the demand for and supply of Entitlements on ASX and the value of AGL existing Shares relative to the Offer Price. If you sell your Entitlements in the Retail Entitlement trading period, you may receive a higher or lower amount than a shareholder who sells their Entitlements at a different time in the Retail Entitlement trading period or through the Retail Shortfall Bookbuild.

If you sell your Entitlement, you will forgo any exposure to increases or decreases in the value of the New Shares had you taken up that Entitlement. Your percentage shareholding in AGL will also be diluted.

3.5.3 If you wish to transfer all or part of your Entitlement other than on ASX

If you wish to transfer all or part of your Entitlement other than on ASX, you must forward a completed Renunciation and Transfer Form to the AGL Share Registry in relation to the part of your Entitlement that you wish to transfer. If the transferee wishes to take up all or part of the Entitlement transferred to them, they must send their Application Monies together with the Entitlement and Acceptance Form related to the Entitlement transferred to them to the AGL Share Registry.

You can obtain a Renunciation and Transfer Form through the AGL Energy Limited Offer Information Line on 1800 824 513 (within Australia) or +61 2 1800 824 513 (outside Australia) or from your stockbroker. The Renunciation and Transfer Form as well as the transferee's Application Monies and the Entitlement and Acceptance Form related to the Entitlement transferred to them must be received by the AGL Share Registry at the mail or hand delivery address in Section 3.9 no later than 5.00pm (Sydney time) on Monday, 15 September 2014.

If the AGL Share Registry receives both a completed Renunciation and Transfer Form and an application for New Shares in respect of the same Entitlement, the transfer will take priority over the application.

If you wish to transfer part of your Entitlement and allow the balance to be sold into the Retail Shortfall Bookbuild, follow the procedures above in respect of the part of your Entitlement you wish to transfer, and do nothing in respect of the balance. You will receive the Retail Premium (if any) in respect of those Entitlements sold through the Retail Shortfall Bookbuild.

If you transfer your Entitlement, you will forgo any exposure to increases or decreases in the value of the New Shares had you taken up that Entitlement. Your percentage shareholding in AGL will also be diluted.

You may only transfer your Entitlement in this way to a purchaser whose address is in Australia or New Zealand, who is not in the United States and is not acting for the account or benefit of a person in the United States. Persons that are in the United States or that are acting for the account or benefit of a person in the United States will not be eligible to purchase, trade, take up or exercise Entitlements. You should inform any transferee of these restrictions.

See Sections 6.1 and 6.14 for more information on restrictions on participation.

3.5.4 If you wish to let your Entitlement be sold through the Retail Shortfall Bookbuild

Any of your Entitlements which you do not take up, sell or transfer will be sold through the Retail Shortfall Bookbuild on Thursday, 18 September 2014 to Eligible Institutional Investors. You will receive the Retail Premium (if any) in respect of those Entitlements sold through the Retail Shortfall Bookbuild (see Section 3.7).

By allowing your Entitlement to be sold through the Retail Shortfall Bookbuild, you will forgo any exposure to increases or decreases in the value of the New Shares had you taken up your Entitlement (or any value for your Entitlement which may have been achieved through its sale on ASX or otherwise). Your percentage shareholding in AGL will also be diluted.

3.6 Ineligible Retail Shareholders

Ineligible Retail Shareholders will receive the Retail Premium (if any) for Entitlements that have been sold on their behalf into the Retail Shortfall Bookbuild.

3.7 Retail Shortfall Bookbuild

Retail Entitlements which are not taken up by close of the Retail Entitlement Offer, and Retail Entitlements of Ineligible Retail Shareholders, will be sold through the Retail Shortfall Bookbuild. Any Retail Premium (being any amount paid in respect of those Entitlements sold into the Retail Shortfall Bookbuild) will be remitted proportionally to such shareholders on or about Monday, 29 September 2014, net of any applicable withholding tax.

Retail Premium amounts, if any, will be paid in either Australian dollars or New Zealand dollars based on your nominated bank account. You will be paid by direct credit to the nominated bank account as noted on AGL's share register. The Retail Premium, if any, is expected to be paid on or about Monday, 29 September 2014.

The Retail Premium may be zero, in which case no payment will be made to holders of those Entitlements sold into the Retail Shortfall Bookbuild. The outcome of the Institutional Shortfall Bookbuild (including the Institutional Premium) is not an indication as to whether there will be a Retail Premium or what any Retail Premium may be.

The ability to sell Entitlements under the Retail Shortfall Bookbuild and the ability to obtain any Retail Premium will depend on various factors, including market conditions. If there is a Retail Premium, it may be less than, more than, or equal to the Institutional Premium or less than, more than or equal to any price or prices that Entitlements may be able to be sold on ASX or otherwise transferred. To the maximum extent permitted by law, AGL, the Underwriters and each of their respective related bodies corporate and affiliates, and each of their respective directors, officers, partners, employees, representatives and agents, disclaim all liability, including for negligence, for any failure to procure a Retail Premium under the Retail Shortfall Bookbuild, for any difference between the Retail Premium and the Institutional Premium and for any failure to obtain any particular exchange rate, or any movements in exchange rates, if exchanging the Retail Premium into New Zealand dollar funds. AGL reserves the right to issue Entitlements under the Retail Shortfall Bookbuild at its discretion.

You should note that if you sell or transfer all or part of your Entitlement or allow all or part of your Entitlement to be sold into the Retail Shortfall Bookbuild, then you will forgo any exposure to increases or decreased in the value of New Shares (or any value for that Entitlement which may have been achieved through its sale on ASX or otherwise) and your percentage shareholding in AGL will be diluted by your non-participation in the Retail Entitlement Offer.

3.8 Payment

You can pay in the following ways:

- > by Bpay®; or
- > by cheque.

Cash payments will not be accepted. Receipts for payment will not be issued.

AGL will treat you as applying for as many New Shares as your payment will pay for in full up to your Entitlement.

Any Application Monies received for more than your final allocation of New Shares will be refunded as soon as practicable after the close of the Retail Entitlement Offer. No interest will be paid to applicants on any Application Monies received or refunded.

3.8.1 Payment by Bpay®

For payment by Bpay®, please follow the instructions on the personalised Entitlement and Acceptance Form or online at www.agl.com.au. You can only make payment via Bpay® if you are the holder of an account with an Australian financial institution that supports Bpay® transactions.

If you are paying by Bpay®, please make sure you use the specific Biller Code and your unique Customer Reference Number (**CRN**) on your personalised Entitlement and Acceptance Form or accessed online at www.agl.com.au. If you have multiple holdings and consequently receive more than one personalised Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those holdings only use the CRN specific to that holding. If you do not use the correct CRN specific to that holding your application will not be recognised as valid.

Please note that should you choose to pay by Bpay®:

- > you do not need to submit your personalised Entitlement and Acceptance Form but are taken to make the declarations, representations and warranties on that Entitlement and Acceptance Form and in Section 3.10; and
- > If you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares which is covered in full by your Application Monies.

It is your responsibility to ensure that your Bpay® payment is received by the AGL Share Registry by no later than 5.00pm (Sydney time) on Monday, 15 September 2014. You should be aware that your financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration in the timing of when you make payment.

3.8.2 Payment by cheque

For payment by cheque, you should complete your personalised Entitlement and Acceptance Form in accordance with the instructions on the form and return it accompanied by a cheque in Australian currency for the amount of the Application Monies, payable to 'AGL Retail Offer' and crossed 'Not Negotiable'.

Your cheque must be:

- > for an amount equal to \$11.00 multiplied by the number of New Shares that you are applying for; and
- > in Australian currency drawn on an Australian branch of a financial institution. Payment cannot be made in New Zealand dollars. New Zealand resident shareholders must arrange for payment to be made in Australian dollars.

Section 3

How to apply

You should ensure that sufficient funds are held in relevant account(s) to cover the Application Monies as your cheque will be processed on the day of receipt. If the amount of your cheque for Application Monies (or the amount for which the cheque clears in time for allocation) is insufficient to pay in full for the number of New Shares you have applied for in your personalised Entitlement and Acceptance Form, you will be taken to have applied for such lower whole number of New Shares as your cleared Application Monies will pay for (and to have specified that number of New Shares on your personalised Entitlement and Acceptance Form) and in Section 3.10. Alternatively, your application will not be accepted.

3.9 Mail or hand delivery

To participate in the Retail Entitlement Offer, your payment must be received no later than the close of the Retail Entitlement Offer, being 5.00pm (Sydney time) on Monday, 15 September 2014. If you make payment via cheque, you should mail or hand deliver your completed personalised Entitlement and Acceptance Form together with Application Monies to:

- > represent and warrant (for the benefit of AGL, the Underwriters and their respective related bodies corporate and affiliates) that you did not receive an invitation to participate in the Institutional Entitlement Offer either directly or through a nominee, are not an Ineligible Retail Shareholder and are otherwise eligible to participate in the Retail Entitlement Offer;

The Entitlements may not be purchased, traded, taken up or exercised by persons in the United States or by persons who are acting for the account or benefit of a person in the United States. Neither the Entitlements nor the New Shares may be offered, sold or resold in the United States or to persons acting for the account or benefit of a person in the United States except in a transaction exempt from, or not subject to, the registration requirements of the US Securities Act and applicable US State securities laws;
- > you are subscribing for or purchasing the Entitlements or the New Shares in an 'offshore transaction' (as defined in Rule 902(h) under the US Securities Act) in compliance with reliance on Regulation S under the US Securities Act;
- > you have not and will not send this Retail Offer Booklet, the Entitlement and Acceptance Form or any other materials relating to the Retail Entitlement Offer to any person in the United States or any other country outside Australia and New Zealand; and
- > if you are acting as a nominee or custodian, each beneficial holder on whose behalf you are submitting the Entitlement and Acceptance Form is resident in Australia or New Zealand and is not in the United States and is not acting for the account or benefit of a person in the United States, and you have not sent this Retail Offer Booklet, the Entitlement and Acceptance Form or any information relating to the Retail Entitlement Offer to any such person.

3.11 Representations by acquirers of Retail Entitlements

Investors who acquire Retail Entitlements on ASX or otherwise will, by acquiring those Retail Entitlements, and by applying to take up all or part of those Retail Entitlements, be deemed to agree to make and be subject to the representations, declarations, warranties and agreements in Section 3.10 above (with references to the personalised Entitlement and Acceptance Form to be read as including any other form provided or required to be provided to AGL, the AGL Share Registry or the person's stockbroker).

The Retail Entitlements may not be purchased, traded, taken up or exercised by persons in the United States or by persons who are acting for the account or benefit of persons in the United States.

Investors should note that if you purchase Retail Entitlements in a transaction on ASX or otherwise, in order to take up or exercise those Entitlements and subscribe for New Shares you:

- > must be an Eligible Retail Shareholder (as defined in Section 6.1), a resident in Australia or New Zealand, or otherwise qualify as an 'Eligible Person'⁵; and
- > must not be in the United States or acting for the account or benefit of a person in the United States.

Note:

- 5 Certain investors in a limited number of foreign jurisdictions (other than the United States) may be Eligible Persons if they satisfy the requirements of that expression as set out in the 'Entitlement and Acceptance Form' in respect of the Entitlement Offer which is available at www.agl.com.au and to be released by AGL to ASX on www.asx.com.au.

If you do not satisfy the above conditions, you will not be entitled to take up Retail Entitlements or subscribe for New Shares.

It is the responsibility of purchasers of Entitlements to inform themselves of the eligibility criteria for exercise. If holders of Entitlements after the end of the trading period do not meet the eligibility criteria, they will not be able to exercise the Entitlements. In the event that holders are not able to take up their Entitlements, those Entitlements will be sold into the Retail Shortfall Bookbuild and holders may receive no value for them.

AUSTRALIAN TAXATION CONSIDERATIONS

4

Energy in
action.®

Since 1837

 **AGL**

This section is a general summary of the Australian income tax, goods and services tax (GST) and stamp duty implications of the Retail Entitlement Offer for Eligible Retail Shareholders.

The taxation implications of the Retail Entitlement Offer will vary depending upon your particular circumstances. Accordingly, you should seek and rely upon your own professional advice before concluding on the particular taxation treatment that will apply to you.

Neither AGL nor any of its officers or employees, nor its taxation and other advisers, accepts any liability or responsibility in respect of any statement concerning taxation consequences, or in respect of the taxation consequences.

The comments in this section deal only with the Australian taxation implications of the Retail Entitlement Offer if you:

- > are a resident for Australian income tax purposes; and
- > hold your Shares on capital account.

The comments do not apply to you if you:

- > are not a resident for Australian income tax purposes; or
- > hold your Shares as revenue assets or trading stock (which will generally be the case if you are a bank, insurance company or carry on a business of share trading); or
- > acquired the Shares in respect of which the Retail Entitlements are issued under any employee share scheme or where the New Shares are acquired pursuant to any employee share scheme; or
- > acquired Retail Entitlements otherwise than because you are an Eligible Retail Shareholder (e.g. where the Retail Entitlements are acquired on ASX).

This taxation summary is necessarily general in nature and is based on the Australian tax legislation and administrative practice in force as at the date of this Retail Offer Booklet. It does not take into account any financial objectives, tax positions, or investment needs of Eligible Retail Shareholders. It is strongly recommended that each Eligible Retail Shareholder seek their own independent professional tax advice applicable to their particular circumstances.

4.1 Issue of Entitlements

The issue of the Entitlements should not, of itself, result in any amount being included in your assessable income.

4.2 Sale of Entitlements

If you sell your Entitlement on ASX or otherwise, you should derive a capital gain for capital gains tax (CGT) purposes equal to the sale proceeds less certain non-deductible costs of disposal.

Individuals, complying superannuation entities or trustees that have held their existing Shares for at least 12 months prior to the date of sale, should be entitled to discount the amount of a capital gain resulting from the sale of the Entitlements (after the application of any current year or carry forward capital losses). The amount of this discount is 50% for individuals and trustees and 33⅓% for complying superannuation entities. This is referred to as the 'CGT discount'. The CGT discount is not available for companies that are not trustees. Trustees should seek specific tax advice regarding the tax consequences arising to beneficiaries because of discount capital gains.

4.3 Entitlements sold into the Retail Shortfall Bookbuild

Any Entitlements not taken up by you will be sold into the Retail Shortfall Bookbuild and any Retail Premium you receive in respect of the Entitlements will be remitted as a cash payment to you.

The Commissioner of Taxation (**Commissioner**) has released Taxation Ruling TR 2012/1 'Retail Premiums paid to shareholders where share entitlements are not taken up or are not available' where the Commissioner ruled that certain retail premiums are assessable as either an unfranked dividend or as ordinary income, and not as capital gains. However, TR 2012/1 states that it does not apply to the share entitlements which are assignable by, tradeable by, or given to a nominee for disposal on behalf of, shareholders entitled to them.

As previously noted, the Entitlements issued by AGL are tradeable by Eligible Retail Shareholders on ASX. In addition, Entitlements which are not taken up by Eligible Retail Shareholders will be sold on their behalf via the Retail Shortfall Bookbuild.

Having regard to the manner in which the Retail Shortfall Bookbuild is to be conducted, AGL's taxation adviser considers that TR 2012/1 should not apply to the Entitlements and any Retail Premium received by Eligible Retail Shareholders should be treated as capital proceeds for the Entitlements sold on their behalf via the Retail Shortfall Bookbuild. Accordingly, in the view of AGL's taxation adviser:

- > Eligible Retail Shareholders whose Entitlements are sold into the Retail Shortfall Bookbuild should derive a capital gain for CGT purposes equal to amount of the Retail Premium received; and
- > Australia resident Eligible Retail Shareholders who are individuals, complying superannuation entities or trustees that have held their existing Shares for at least 12 months prior to the date of sale, should be entitled to the CGT discount (see Section 4.2 above) in respect of any capital gain resulting from the sale of the Entitlements into the Retail Shortfall Bookbuild (after the application of any current year or carry forward capital losses).

However, the Commissioner has not issued any public ruling or other guidance specific to the tax treatment of Retail Premiums received in the particular circumstances of the Retail Shortfall Bookbuild. Eligible Retail Shareholders need to be aware that the Commissioner may seek to apply the tax treatment specified in TR 2012/1 to Entitlements sold via the Retail Shortfall Bookbuild and treat the Retail Premium as assessable either as an unfranked dividend or as ordinary income and not as a capital gain. Eligible Retail Shareholders who are considering allowing their Entitlements to be sold into the Retail Shortfall Bookbuild should consider instead selling their Entitlements on ASX, the tax treatment for which is more certain (refer Section 4.2 above).

Given the uncertainty surrounding the tax treatment of Retail Premiums, AGL recommends that you seek your own tax advice if you propose to allow your Entitlements to be sold into the Retail Shortfall Bookbuild.

If you are an Australian tax resident shareholder, and you have not previously provided your TFN or ABN to AGL, you may wish to do so prior to the close of the Retail Entitlement Offer to ensure that withholding tax is not deducted from any Retail Premium payable to you at the current rate of 49%. You are able to provide your TFN or ABN online with the AGL Share Registry at www.linkmarketservices.com.au. When providing your details online, you will be required to enter your Security Reference Number (**SRN**) or Holder Identification Number (**HIN**) as shown on your Issuer Sponsored/CHESS statements and other personal details such as your postcode.

4.4 Exercise of Entitlements

Neither income tax nor a capital gains tax liability will arise for you on the exercise (i.e. taking up) of your Entitlements.

If you take up all or part of your Entitlement, you will acquire New Shares with a cost base for CGT purposes equal to the Offer Price payable by you for those New Shares plus certain non-deductible incidental costs you incur in acquiring them.

New Shares will be taken to have been acquired on the day you exercise the Entitlements.

4.5 Dividends on New Shares as a result of Entitlements taken up

Any future dividends or other distributions made in respect of New Shares will be subject to the same income taxation treatment as dividends or other distributions made on existing Shares held in the same circumstances.

4.6 Disposal of New Shares

The disposal of a New Share will constitute a disposal for CGT purposes.

On disposal of a New Share, you will make a net capital gain if the capital proceeds on disposal exceed the total cost base of the New Share. You will make a net capital loss if the capital proceeds are less than the total reduced cost base of the New Share. The cost base of New Shares is described above in Section 4.4.

Individuals, trustees or complying superannuation entities that have held New Shares for 12 months or more at the time of disposal should be entitled to apply the applicable CGT discount factor to reduce the capital gain (after offsetting capital losses). The CGT discount factor is 50% for individuals and trustees and 33⅓% for complying superannuation entities.

New Shares will be treated for the purposes of the capital gains tax discount as having been acquired when you exercise your Entitlement. Accordingly, in order to be eligible for the CGT discount, the New Shares must be held for at least 12 months after the date that you exercised your Entitlement.

If you make a capital loss, you can only use that loss to offset other capital gains from other sources; i.e. the capital loss cannot be used against taxable income on revenue account. However, if the capital loss cannot be used in a particular income year it can be carried forward to use in future income years, providing certain tests are satisfied.

4.7 Taxation of Financial Arrangements (TOFA)

The TOFA provisions operate to make assessable or deductible, gains or losses arising from certain 'financial arrangements' (importantly, the CGT discount is not available for any gain that is subject to the TOFA provisions).

The TOFA provisions should not apply on a mandatory basis for the following taxpayers:

- > individuals;
- > superannuation funds and 'managed investment schemes' if the value of their assets is less than \$100 million; or
- > other taxpayers whose aggregated turnover (having regard to the turnover of connected entity's or affiliates) is less than \$100 million, the value of their assets is less than \$300 million, and the value of their financial assets is less than \$100 million.

Taxpayers who are not automatically subject to TOFA can elect to be subject to TOFA on a voluntary basis.

Shareholders who are subject to TOFA should obtain their own tax advice as the precise implications under TOFA (if any) will depend on their facts and circumstances and in particular what elections they may have made.

4.8 Other Australian taxes

No GST or stamp duty will be payable by you in respect of the issue, sale or taking up of Entitlements or the acquisition of New Shares.

Transaction rationale

9

Compelling value proposition for low cost generation assets.

Strategy	> Acquisition entirely consistent with AGL's integrated strategy
Compelling Value Proposition	<ul style="list-style-type: none"> > Conservative valuation approach > Modelled return exceeds both AGL's cost of capital and investment IRR hurdle of 12%¹ > Delivers substantial future cash flows > Immediately accretive to Underlying EPS² in FY15 despite current low wholesale prices
Long Term Low Cost Coal Contracts	<ul style="list-style-type: none"> > Secure and low cost fuel supply in place to 2025 at a weighted average delivered contracted price of ~\$33/t (real Jun-14) > Central Hunter Valley location and significant existing delivery infrastructure provides competitive advantage in coal procurement
Lowest Cost Thermal Plant	<ul style="list-style-type: none"> > Lowest SRMC³ of major base-load generators in NSW <ul style="list-style-type: none"> > ~35-45% lower than the next two lowest major base-load generators
Improved Risk Management	<ul style="list-style-type: none"> > Adds scale and diversity to AGL's generation portfolio > Increases AGL generation to ~100% of sales volume > NSW represents AGL's largest retail electricity load centre <ul style="list-style-type: none"> > Largely self supplied in NSW (replaces ~\$500 million p.a. in purchases) > Highly flexible Bayswater units improve risk management capability

Strategic Rationale

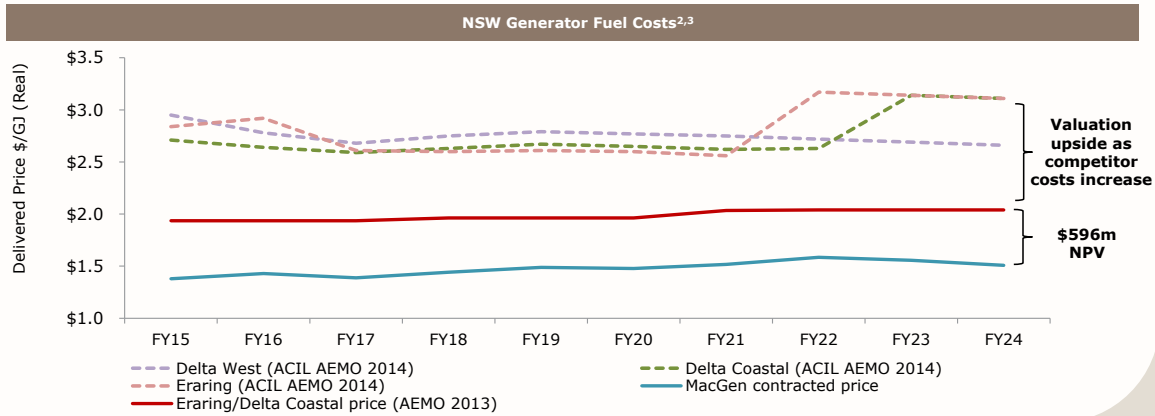

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Long-term coal cost advantage

11

Highly competitive coal position relative to other NSW generators.

- > Value of MacGen’s fuel position conservatively estimated at \$768 million including \$596 million in coal contracts:
 - » Substantially contracted until 2025 with low cost coal
 - » Lowest SRMC position amongst major NSW base-load generators
 - » AEMO/ACIL forecasts of NSW coal generator fuel costs have increased \$0.50-\$1.00/GJ since 2013¹

Long-term, low cost coal contracts

12

Low cost coal contracted to 2025.

- > Access to multiple, predominantly open-cut, low-cost fuel sources
- > Flexibility to burn high ash coal from surrounding mines
- > Long term relationships with three highly experienced suppliers and mine operators:
 - » Glencore / Xstrata (Mangoola)
 - » Peabody (Wilpinjong)
 - » BHP (Mt Arthur)
- > Strategic coal handling infrastructure accrues benefits to both Bayswater and Liddell
- > Hunter Valley location, rail constraints & distance to the coast work to MacGen’s advantage for non-export Hunter Valley product
- > Annual coal burn substantially contracted to 2025
- > Includes optionality to flex volumes
- > MacGen contracted coal book not exposed to export netback type pricing

NSW supply/demand balance set to improve

16

Declining gas generation to substantially impact supply.

- > NSW expected to shift from net importer to net exporter to Queensland
 - » Increased demand in Queensland from LNG projects (~850 MW)
 - » Reduction in ramp gas availability for Queensland generation as LNG projects commissioned
 - » Queensland generators to significantly reduce gas generation output as fuel supply diverts to LNG projects and gas costs increase to LNG net-back (7 - 8 TWh pa)
 - » NSW - Queensland Inter-connector flows to reverse from 200 MW into NSW to 300 MW exported. Net 500 MW swing in NSW generation output
- > NSW supply withdrawals
 - » Wallerawang unit 7 decommissioned, unit 8 mothballed in 2014² (total of 1,000 MW)
 - » Reductions in NSW gas generation output expected as NEM wide gas price increases impact NEM gas generation fleet (~5800 MW baseload/intermediate gas generation in NEM)

Key Risks

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Key risks

45

1.0 Introduction

Investors should be aware that there are risks associated with an investment in AGL.

Some of the principal factors which may, either individually or in combination, affect the future operating performance of AGL are set out below. Some are specific to an investment in AGL, the New Shares and the proposed acquisition of MacGen, whilst others are of a more general nature.

The summary of risks below is not exhaustive, and this Presentation does not take into account the personal circumstances, financial position or investment requirements of any particular person. Additional risks and uncertainties that AGL is unaware of, or that it currently considers to be immaterial, may also become important factors that adversely affect the future performance of AGL, the New Shares and/or MacGen.

It is important for Shareholders and investors, before taking up the Entitlement Offer or investing in AGL, to read and understand the entire Presentation and to carefully consider these risks and uncertainties. You should have regard to your own investment objectives and financial circumstances and should seek professional guidance from your stockbroker, solicitor, accountant or other professional adviser before deciding whether or not to invest.

2.0 Risks Associated with AGL

The future operating performance of AGL and the value of the investment in the New Shares may be affected by risks relating to AGL's business. Some of these risks are specific to AGL while others relate to the general industry in which AGL operates and economic conditions. Where practicable, AGL seeks to implement risk mitigation strategies to minimise the exposure to some of the risks outlined, although there can be no assurance that such arrangements will fully protect AGL from such risks. Failure to effectively mitigate these risks could result in a reduction in AGL's profits and deterioration in AGL's financial position.

2.1 Electricity market

AGL is exposed to the risk of significant financial loss arising from exposure to volatility and variability in the wholesale electricity market.

Underperformance in the wholesale electricity market would be most likely to result from a failure to manage an appropriate and profitable balance between energy supply and demand. Components of this risk include:

- > Macquarie Generation Acquisition
- > 20 August 2014
- > AGL External

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Key risks (cont.)

46

Downturn in consumption – Levels of energy usage may be adversely affected by a number of economic, social, environmental, regulatory and industry specific conditions outside AGL's control. Levels of energy usage may also be affected by future technological developments allowing customers to better manage their energy needs, or by customers reducing energy consumption or generating energy themselves. A general economic downturn may reduce the business activity and energy usage of some customers. Industrial customers may be sensitive to factors specific to their own industry, which may lead to a reduction in their energy consumption or even closure of their operations;

Credit risk – AGL's financial performance is partially dependent on counterparties to contracts satisfying their contractual obligations (whether financial or otherwise). There is a risk that AGL's counterparties may be unable to meet their obligations and there is no guarantee of AGL being able to obtain damages sufficient to compensate it for its losses arising as a result;

Energy supply and operating risk – AGL partially relies on electricity generated from electricity generation assets that it owns or controls to manage the wholesale cost of electricity. There is a risk that some of these assets may not be available for use when required or unable to export electricity generated due to machinery break down, fire, adverse weather, industrial relations disputes, natural disasters, catastrophic events, transmission failures or other unplanned outages; and

Price risk – AGL operates in wholesale electricity markets and as such has direct and indirect exposure to wholesale electricity prices. AGL generates electricity from owned and controlled assets as well as managing electricity price risk via hedging contracts and other risk management instruments. Wholesale electricity prices can vary significantly between half hour pricing intervals, and can be influenced by many independent and interdependent factors, including electricity generation costs, weather, customer demand and behaviour, competitive behaviour of retailers and generators, availability of supply, actions of the market operator, and interpretation of the market rules by the market operator as well as by changes in market rules. AGL's Merchant Energy business also procures additional hedge cover through contracts with third parties and other risk management instruments to manage this exposure, but there is the risk that the hedges may not be effective or may not provide a balanced position with respect to AGL's exposure to price risks, whether because of unexpected events (including weather events or loss or reduction of electricity interconnections between states), unavailability of hedges (at all or on acceptable pricing and terms), error (whether forecasting, hedging or trading), or other reasons.

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Key risks (cont.)

47

2.2 Gas market

AGL is exposed to the risk of significant financial loss arising from exposure to physical wholesale gas markets (including risks of failure to receive and/or failure to supply) as well as exposure to the spot market for gas. AGL has a substantial gas portfolio requirement – for its customers, and for its own electricity generation requirements. Some of the risks associated with this portfolio are:

The inability to supply gas to meet market and own requirements – there is a risk that natural gas supplies may be interrupted unexpectedly and without prior warning for an indeterminate period due to problems at the gas fields or processing plants, or at the pipelines connecting the gas fields to AGL's markets;

Development of upstream reserves – changes in commodity prices as well as fiscal and other laws or regulations could adversely affect the economic viability of reserves development and production for both AGL (in respect of its own upstream development and production) and the counterparties from whom AGL purchases gas. Other risks include undeveloped reserves and resources not proceeding to development or developed reserves not being ultimately recovered, production volume and operating cost uncertainty, operational integrity of sub-surface equipment and surface processing, storage and pipeline infrastructure, and end-of-life remediation costs that exceed what has been provided for;

Price risk – AGL is exposed to pricing risk through its long term gas supply arrangements, some of which have price review clauses at regular intervals over the term of the contracts. Price rises may not be able to be fully passed on to customers, including because of contractual restrictions and regulation of the price of gas sold to some residential and small commercial and industrial customers. AGL's Merchant Energy business also procures additional hedge cover through contracts with third parties and other risk management instruments to manage this exposure, but there is the risk that the hedges may not be effective or may not provide a balanced position with respect to AGL's exposure to price risks, whether because of unexpected events (including weather events), unavailability of hedges at all or on acceptable pricing, forecasting, hedging or trading error, or other reasons;

- > Macquarie Generation Acquisition
- > 20 August 2014
- > AGL External

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Key risks (cont.)

48

Compliance risk and contractual and other requirements in complex wholesale gas market operations – the price of gas sold to some residential and small commercial and industrial customers is fixed by regulation whereas AGL sources gas to fulfil customer demand either through highly regulated upstream gas development projects or through unregulated, competitive wholesale contractual arrangements. As such, there is a risk that AGL is unable to pass-through all costs associated with delivering gas to the end consumer; and

Credit risk – AGL's financial performance is partially dependent on counterparties to contracts satisfying their contractual obligations (whether financial or otherwise). There is a risk that AGL's counterparties may be unable to meet their obligations and there is no guarantee of AGL being able to obtain damages sufficient to compensate it for its losses arising as a result.

2.3 Environmental markets

AGL is exposed to the risk of significant financial loss arising from exposure to volatility and variability in existing and emerging environmental markets or from not meeting mandatory obligations. AGL is required to comply with a range of regulations intended to reduce carbon emissions and increase the proportion of renewable electricity generation. In general, the costs of complying with climate change regulations, including the renewable energy target, are recovered from customers. However, there is a risk that retail price regulation, market forces and contract terms limit the ability of AGL to fully pass these costs through to customers. There are many other state, national and international markets and obligations, the most material being:

- > the Renewable Energy Target (RET), including the:
 - » Large-Scale Renewable Energy Target Scheme (LRETS);
 - » Small-Scale Renewable Energy Scheme (SRES);
- > National Greenhouse & Energy Reporting (NGER); and
- > the Energy Efficiency Opportunity (EEO) program.

There is currently a review of the Renewable Energy Target being conducted by a panel appointed by the Commonwealth Government. Furthermore, the Climate Change Authority is required to conduct a statutory review of the policy before the end of 2014. These reviews may result in changes to the policy being recommended and possibly adopted by the Commonwealth Parliament. Legislation is currently before Commonwealth Parliament which would retrospectively repeal the EEO Program as at 30 June 2014.

Key risks (cont.)

49

2.4 Regulatory environment

AGL is required to comply with a number of regulatory obligations, covering matters such as billings, disconnections, marketing practices, customer hardship and call centre performance, as well as regulation in relation to its generation, merchant energy and upstream gas and other operations. There is a risk that AGL may fail to comply with its regulatory obligations which, in extreme circumstances, could lead to the imposition of fines and penalties or the loss of operating licences, or that compliance may lead to a reduction in AGL's profits or a deterioration in AGL's financial position. The main components to this risk are:

- > compliance with legislative and licence obligations; and
- > AGL's exposure to regulated pricing.

AGL is exposed to regulated retail pricing in New South Wales (gas only) and Queensland (electricity only) which directly affects a portion of AGL's customer base. Price regulation of NSW retail electricity prices were removed from 1 July 2014. While retail electricity and gas prices have been deregulated in Victoria (2009) and South Australia (2013), there is a risk of re-regulation if competition is deemed to be ineffective. The Queensland Government has announced that it intends to remove the regulation of retail electricity prices effective 1 July 2015 in south east Queensland where AGL operates.

Given AGL's exposure to regulated pricing in the remaining regulated markets and the risk that it may not be able to influence regulated pricing decisions, AGL may not be in a position to fully respond in a timely manner (or at all) to movements in pricing in wholesale electricity and gas markets. There is a risk that AGL's potential revenues are limited or reduced or that its costs are increased as a result of regulatory pricing or compliance with its regulatory obligations.

2.5 Energy policy

AGL's financial performance could be affected by changes to legal, regulatory, fiscal or other policies adopted by various regulatory authorities, including climate change policies and policies relating to the development and ongoing production of upstream gas reserves. Future changes in such policies or laws are unpredictable and are beyond AGL's control. Changes in law or regulatory policy could adversely affect one or more of AGL's businesses and could require AGL to incur substantial costs to ensure compliance. AGL's ability and capacity to influence and respond to policy and regulation is therefore a key

- > Macquarie Generation Acquisition
- > 20 August 2014
- > AGL External

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Key risks (cont.)

50

risk that is dependent on AGL's ability to:

- > influence, and adapt to, energy and related policy;
- > secure licences and permits required for growth projects; and
- > influence market design.

2.6 Operating in a competitive market

AGL's retail activities are in fully contestable markets, where customers are able to choose from a number of alternative retailers. The level of customer "churn", when customers switch between retailers, may be affected by a range of factors including the marketing activities of AGL and other retailers, customer service experience and electricity prices. There is also a risk of new competitors entering into the market which may further increase AGL's exposure to customer churn or to additional advertising and other costs of customer retention and acquisition.

2.7 Authorisations and permits

If AGL does not obtain the necessary permits and/or licences for upstream gas and power projects, there is a risk that the assets will not be built or will be materially delayed, and existing assets will be impaired. There are a number of authorisations and permits that will be required for infrastructure development projects that are in AGL's current project development pipeline, including the AGL Solar project. Various licences and approvals will be required for ongoing and future development of AGL's upstream gas and power investments.

2.8 Development risk

AGL undertakes investments in projects for the construction or expansion of plant, facilities and infrastructure, including the development of thermal power stations, wind farms, solar photovoltaic projects, gas production and storage facilities, and hydro-electric power stations. There is a risk that projects are delayed, cost more than intended or do not perform as planned. There is also a risk that AGL does not effectively engage with and influence stakeholders (including local communities, politicians and media) in relation to plans to develop, build and operate power development and upstream gas projects. These risks may lead to lower returns on investment, reduced profitability, and output which is delayed or lower than originally planned.

2.9 Refinancing

AGL's existing debt tranches will need to be refinanced on their respective maturity dates. AGL may incur increased borrowing costs, or may even be unable to refinance with new debt if its credit profile has deteriorated materially, or if there are reductions in debt market liquidity at or around the time that AGL needs to refinance its various debt tranches. Whether this occurs will depend on numerous factors, some of which are outside AGL's control, such as the prevailing economic, political and capital market conditions and credit availability.

2.10 Other financing risks

Other risks in relation to AGL's debt financing include exposure to adverse movements in market interest rates. Although AGL has interest rate swap contracts and other hedging instruments in place, these may not provide a complete hedge. AGL is also obliged to adhere to covenants in its debt facilities, including financial undertakings. If AGL's performance is materially below expectations, there is a risk that it may not comply with its borrowing covenants which may result in it being required to repay its debt facilities earlier than their scheduled maturities.

2.11 Information technology

AGL is exposed to the risk of financial loss if its information technology strategy, infrastructure, applications, service and support do not deliver adequately and in accordance with expectations.

2.12 Litigation and legal matters

AGL is exposed to the risk of claims by gas and electricity users, native title claims, tenure disputes, environmental and occupational health and safety claims, industrial disputes and third party losses resulting from transmission disruptions, amongst other claims. AGL is not currently a party to any litigation the outcome of which is likely to have a material adverse effect on its business or financial position.

2.13 Taxation

Taxation positions which AGL has adopted may not be accepted by the relevant taxation authorities. AGL is subject to regular tax risk reviews and audits by the Australian Taxation Office as part of their regular review of big business. The Commonwealth, or (where applicable) State, Territory or foreign governments, may alter tax regimes applying to AGL or their interpretation and administration in ways which could adversely impact AGL's financial position.

2.14 Control

AGL has a number of investments in which it does not have a controlling interest which means that AGL cannot exercise full control of those investments.

2.15 Change in credit rating

AGL has obtained a credit rating from a rating agency which could be reviewed, suspended or downgraded. The rating agency could also change the methodology by which it rates AGL. AGL's cost of funds, margins, access to capital markets, access to the national electricity markets and other aspects of its performance (including requirements to provide credit support under material contracts) may be affected if it fails to maintain its credit rating.

2.16 Acquisitions

AGL regularly examines new acquisition opportunities, where the acquisitions would complement or enhance AGL's existing operations. When and whether acquisitions are made will depend on a number of factors, including availability of opportunities and the attractiveness of those opportunities, market conditions, funding requirements and integration issues. There can be no assurance that AGL will successfully identify, acquire and integrate such businesses. Furthermore, there is no guarantee that any acquisition will perform as expected or that AGL will be able to realise expected synergies.

Acquisitions may also expose AGL to unanticipated business risks and liabilities. The process of integrating new businesses into AGL's existing operation may result in unforeseen operating difficulties and may require significant management, financial or personnel resources that would otherwise be available for on-going development or expansion of existing operations. If any of these occur, it may have a material adverse impact on AGL's financial position and performance.

2.17 Environmental issues

Failure to conduct AGL's activities in accordance with strict controls and processes may cause harm to the environment. Damage to the environment may give rise to significant monetary damages, suspension of operating activities and reputational harm. Actual or perceived environmental harm from AGL's activities may also damage AGL's relationship with various external stakeholders including impacted communities, organisations and governments. Each of these risks may restrict the ability of AGL to operate its activities or pursue development opportunities.

3.0 Risks Associated with the Proposed MacGen Acquisition

The future operating performance of AGL and the value of the New Shares may also be affected by risks relating to AGL's proposed acquisition of MacGen. Some of these risks are specific to MacGen while others relate to the general industry in which AGL and MacGen operate and economic conditions.

3.1 Plant performance and capital expenditure

Given AGL's substantial electricity customer base and relative lack of electricity generation capacity in New South Wales, the MacGen acquisition will significantly increase AGL's physical hedging capacity where it has previously relied on contractual hedging capacity in conjunction with the rest of its physical portfolio inter-state. However the acquisition will also increase AGL's exposure to operating risks in relation to electricity generation. There is a risk that some of these assets may not be available for use when required or unable to export electricity generated due to machinery break down, fire, adverse weather, industrial relations disputes, natural disasters, catastrophic events, transmission failures or other unplanned outages. In recent years, there has been a deteriorating availability trend at both Bayswater and Liddell, with Liddell experiencing several major generator failures. AGL has budgeted for substantial capital expenditure in the first 4 years of ownership to stabilise plant reliability, but greater or earlier expenditure than that budgeted for may be required to achieve this objective.

3.2 Access to coal

To the extent that MacGen requires coal in excess of the volumes already contracted for or stockpiled, it is exposed to the risk of financial loss arising from an inability to access coal in the required volumes and quality and from volatility in the price at which it can procure that coal. Coal pricing is a function of a number of factors including volume, quality, transportation (distance and mode) as well as domestic and export market supply and demand dynamics for thermal coal. Coal mining operations may be restricted by increasing environmental regulations. Mine production may be adversely impacted by changes to operational costs and conditions, equipment failures, mine flooding and geological uncertainties. Whilst AGL is exposed to these risks, MacGen's coal requirements to produce the assumed levels of forecast generation are substantially contracted to 2025. MacGen's ability to access coal also depends on arrangements for the delivery of coal in a timely manner, including arrangements in relation to rolling stock and coal handling infrastructure. These risks could adversely impact MacGen's ability to generate electricity if an interruption to coal supplies continued until stockpiles were exhausted.

3.3 Environmental risks

The MacGen acquisition brings with it certain environmental risks related to the past development and operation of the power stations, including risks associated with soil and groundwater contamination and the risk of dust diseases caused by exposure to asbestos. These risks are at both power stations but are more evident at Liddell, which was commissioned in 1973, than Bayswater which was commissioned in 1986. These risks are mitigated by the terms of the agreement for the purchase of MacGen. Under that agreement, AGL has the benefit of an indemnity for losses arising from pre-completion contamination liabilities identified before completion or under baseline studies in the first 12 months after completion of the purchase. However, AGL potentially has a residual exposure to the extent that the indemnity does not fully cover AGL's loss in respect of a claim against AGL, including in relation to consequential loss and loss of profits. AGL also has the benefit of an indemnity from the State of New South Wales in relation to dust disease claims relating to the period prior to completion and such claims will also be excluded from the acquisition.

Key risks (cont.)

55

3.4 Shift in NSW wholesale electricity risk profile from financial market risk to operational performance risk

At present, AGL substantially mitigates its risk of cost of NSW wholesale electricity supply via a variety of financial products mainly financial derivatives. Upon acquisition, AGL will over time significantly reduce its position in NSW financial derivatives and other similar products and instead rely primarily on the physical generation of MacGen to cover its wholesale electricity position in NSW. In effect, this is a reduction in financial market risk and a corresponding increase in operational performance risk.

3.5 Long term exposure to NSW wholesale electricity prices

Until now, AGL has primarily purchased wholesale electricity in the NSW market through a combination of pool purchases and financial products. Historically over the long term, the rise and fall of wholesale prices have simply been passed on to customers at a retail price level, with limited impact on AGL. The acquisition of MacGen will now mean that AGL substantially self supplies its NSW wholesale electricity needs from owned generation. As a result, to the extent that changes in NSW wholesale prices become reflected in NSW retail prices or to the extent AGL's retail customer demand does not match AGL's physical generation, AGL will be directly exposed to changes in wholesale prices.

3.6 Industrial relations

In acquiring MacGen AGL will take on a significant workforce that is predominantly subject to enterprise bargaining agreements. Over the life of the Bayswater and Liddell plants, industrial relations disputes with the potential to result in significant plant outages and/or a significant increase in labour costs may occur. An enterprise bargaining agreement is in place in relation to each plant until December 2016.

3.7 Carbon legislation

The Federal Government is currently developing policies which may require electricity generators to pay a penalty for emissions above a historical baseline. While there continues to be uncertainty around these initiatives, it is possible that new carbon reduction regulations may impose unexpected costs on coal-fired electricity generators. Furthermore, in the event of greater global emphasis on greenhouse gas emission reductions, there remains the possibility that new policies will be implemented which may impose costs on coal-fired generators.

Key risks (cont.)

56

3.8 Tomago aluminium smelter

MacGen currently holds contracts for approximately 900 MW with the Tomago Aluminium smelter. Tomago Aluminium Corporation has foreshadowed the possibility of the early renegotiation of contracts for the supply of electricity from MacGen to the Tomago Aluminium smelter or its closure post 2017. If the Tomago Aluminium smelter renegotiates terms of the contracts, reduces its production volumes or closes, this may have an adverse effect on AGL's financial position or performance.

3.9 Availability of water

MacGen has various water entitlements which are able to be reviewed in certain circumstances. AGL may suffer financial loss if MacGen's existing water entitlements are reduced or rescinded. MacGen's dependency on water for the operation of Bayswater and Liddell means that its operations are exposed to drought risk. This risk is mitigated to some extent by MacGen's extensive water entitlements combined with its strategic water storage and pumping infrastructure.

3.10 Limited expertise in running coal fired power stations

AGL has limited experience running coal fired power stations, and that experience is principally with Loy Yang A, which uses brown coal mined on site rather than black coal sourced from third parties and transported to the power station as is the case with MacGen. AGL has a Merchant Operations engineering group consisting of approximately 80 engineers with a range of relevant experience. As part of the transaction, approximately 660 employees currently operating the Bayswater and Liddell power stations will transfer to AGL. AGL will utilise the expertise of these employees, as well as those from AGL Loy Yang, to implement its asset management strategy which is designed to optimise the performance of both MacGen plants.

3.11 Incorrect acquisition assumptions

There is a risk that the proposed acquisition may not be completed or that MacGen will fail to perform in line with the acquisition assumptions.

If the acquisition of MacGen is not completed, AGL retains the flexibility to use the net proceeds to fund future acquisitions and other development projects (consistent with AGL's integrated strategy) that are expected to commence over the next 2 – 3 years or for general corporate purposes, or to return capital to shareholders.

In particular, statements in this Presentation regarding the impact of the proposed acquisition on AGL's EPS, credit profile and more generally are based on certain assumptions including:

- > MacGen is acquired in September 2014;
- > AEMO low to medium demand cases with spot and contract wholesale electricity prices based on recent forward curves observed in the market and longer term pricing based on AGL's in-house modelling;
- > the RET trajectory and the rate of uptake of residential solar PV;
- > material increases in capital expenditure over and above that planned by MacGen under State ownership to underpin assumed levels of generation, plant availability, achievement of the technical lives of the plants and end of life remediation costs;
- > coal price assumptions are based on existing contractual terms with assumptions regarding escalation of relevant indices, beyond the term of current coal contracts, based on independent market forecasts;
- > zero carbon price;
- > wage, materials and general inflation rates and interest rates;
- > funding of the acquisition as set out on slide 29;
- > depreciation is consistent with the Pro forma Acquisition Balance Sheet shown on slide 30; and
- > performance of the Tomago contract.

If the above assumptions are not met then the impact of the MacGen acquisition on EPS and AGL's credit profile may differ from that shown in this presentation, potentially adversely.

Some of the information regarding MacGen has been derived from information made available by or on behalf of the vendor. Although AGL has conducted reasonable levels of due diligence, AGL has not verified the accuracy and completeness of all information provided to it. To the extent that any of this information is incomplete, inaccurate or misleading, there is a risk that the future financial performance of AGL may differ from AGL's expectations, potentially adversely.

Further, if the MacGen purchase agreement or other MacGen material contracts are determined not to operate consistently with AGL's understanding, there is a risk that the future financial performance of AGL may differ from AGL's expectations, potentially adversely including writing down the carrying value of assets.

4.0 Risk associated with the New Shares**4.1 Risk of dividends not being paid**

The payment of dividends by AGL is announced at the time of release of AGL's half year and full year results as determined by the Board from time to time at its discretion, dependent on the profitability and cash flow of AGL's business. While AGL has a stated dividend policy, circumstances may arise where AGL is required to reduce or cease paying dividends for a period of time.

4.2 Investment in Equity Capital

There are general risks associated with investments in equity capital. The trading price of shares in AGL may fluctuate with movements in equity capital markets in Australia and internationally. This may result in the market price for the New Shares being less or more than the Offer Price. Generally applicable factors which may affect the market price of shares include:

- > general movements in Australian and international stock markets;
- > investor sentiment;
- > Australian and international economic conditions and outlook;
- > changes in interest rates and the rate of inflation;
- > changes in government regulation and policies;
- > announcement of new technologies; and
- > geo-political instability, including international hostilities and acts of terrorism.

No assurances can be given that the New Shares will trade at or above the Offer Price. None of AGL, its Board or any other person guarantees the market performance of the New Shares.

Key risks (cont.)

59

4.3 Risks associated with renouncing rights under the Offer

Prices obtainable for retail entitlements may rise and fall over the entitlement trading period. If you sell your entitlements at one stage in the retail entitlement trading period, you may receive a higher or lower price than a shareholder who sells their entitlements at a different stage in the retail entitlement trading period or through the retail shortfall bookbuild.

If you are a shareholder and renounce your entitlement by doing nothing under the entitlement offer, there is no guarantee that any value will be received for your renounced entitlement through the bookbuild process.

The ability to sell entitlements under a bookbuild and the ability to obtain any value for them will be dependent upon various factors, including market conditions. Further, the bookbuild price may not be the highest price available, but will be determined having regard to a number of factors, including having binding and bona fide offers which, in the reasonable opinion of the underwriters, will, if accepted, result in allocations acceptable to them and AGL to clear the entire book.

To the maximum extent permitted by law, AGL, the underwriters and any of their respective related bodies corporate, affiliates, directors, officers, employees or advisers, will not be liable, including for negligence, for any failure to procure any proceeds for entitlements offered under the bookbuild.

There is no guarantee that there will be a viable market during, or on any particular day in, the retail entitlement trading period, on which to sell retail entitlements on ASX.

You should note that if you sell, or do not take up, all or part of your entitlement, then your percentage shareholding in AGL will be diluted by not participating to the full extent in the entitlement offer and you will not be exposed to future increases or decreases in AGL's share price in respect of the new shares which would have been issued to you had you taken up all of your entitlement.

The tax consequences from selling entitlements or from doing nothing may be different. Before selling entitlements or choosing to do nothing in respect of entitlements, you should seek independent tax advice and may wish to refer to the tax disclosure contained in the retail offer booklet which will provide further information on potential taxation implications for Australian shareholders.

Statutory rights of action for damages or rescission in Ontario

Rule 45-501 under the *Securities Act* (Ontario) provides that when an offering memorandum, such as this Presentation, is delivered to an investor to whom securities are distributed in reliance upon the "accredited investor" prospectus exemption in Section 2.3 of NI 45-106, the right of action referred to in Section 130.1 of the *Securities Act* (Ontario) ("Section 130.1") is applicable unless the prospective purchaser is:

- a) a Canadian financial institution, meaning either:
 - 1) an association governed by the *Cooperative Credit Associations Act* (Canada) or a central cooperative credit society for which an order has been made under section 473(1) of that Act;
 - 2) a bank, loan corporation, trust company, trust corporation, insurance company, treasury branch, credit union, caisse populaire, financial services cooperative, or league that, in each case, is authorized by an enactment of Canada or a jurisdiction of Canada to carry on business in Canada or a jurisdiction in Canada;
- c) a Schedule III bank, meaning an authorized foreign bank named in Schedule III of the *Bank Act* (Canada),
- d) The Business Development Bank of Canada incorporated under the *Business Development Bank of Canada Act* (Canada), or
- e) a subsidiary of any person referred to in paragraphs (a), (b) or (c), if the person owns all of the voting securities of the subsidiary, except the voting securities required by law to be owned by the directors of the subsidiary.

Section 130.1 provides purchasers who purchase securities offered by an offering memorandum with a statutory right of action against the issuer of securities and any selling securityholder for rescission or damages in the event that the offering memorandum or any amendment to it contains a "misrepresentation", without regard to whether the purchaser relied on the "misrepresentation". "Misrepresentation" means an untrue statement of a material fact or an omission to state a material fact that is required to be stated or that is necessary to make any statement not misleading in light of the circumstances in which it was made.

- a) no action shall be commenced more than, in the case of an action for rescission, 180 days after the date of the transaction that gave rise to the cause of action; or in the case of any other action, the earlier of (i) 180 days after the plaintiff first had knowledge of the facts giving rise to the cause of action, or (ii) three years after the date of the transaction that gave rise to the cause of action;

Prospective purchasers of the entitlements or the New Shares should consult their own tax adviser with respect to any taxes payable in connection with the acquisition, holding, or disposition of the entitlements or the New Shares as any discussion of taxation related matters in this Presentation is not a comprehensive description and there are a number of substantive Canadian tax compliance requirements for investors in the Provinces.

Key Assumptions

Key assumptions

76

Effect of MacGen acquisition on earnings.

Underlying Profit is the Statutory Profit adjusted for significant items and changes in fair value of financial instruments. Underlying Profit has been presented with reference to the Australian Securities and Investments Commission Regulatory Guide 230 "Disclosing non-IFRS financial information" issued in December 2011. AGL's policy for reporting Underlying Profit is consistent with this guidance and the Directors have had the consistency of the application of the policy reviewed by the auditors of AGL. Statutory Profit contains a number of items that do not portray the ongoing performance of the business. Underlying Profit excludes the impact of these items to provide a better understanding of business performance.

To reflect the impact of acquisition accounting and one-off items, the EPS impact has been calculated on an adjusted basis (**Underlying EPS**). Underlying EPS is calculated by adding back to reported EPS the non-recurring significant items and fair value movement. The Directors believe that Underlying EPS is a better measure to illustrate the underlying performance of the acquisition, and allows for more relevant comparison of financial performance between financial periods.

Key assumptions used to determine the impact of the MacGen Acquisition on EPS are set out in the bullet points below. This information is intended to assist investors in assessing, where relevant, the reasonableness and likelihood of the assumptions occurring and is not a representation that the assumptions will occur. Potential investors should be aware that the timing of actual events and the magnitude of their impact might differ from that assumed in preparing this information, and that this may have a positive or negative impact on AGL's financial performance. Investors are advised to review the key assumptions in this section in conjunction with section on Key Risks commencing on slide 44:

- > MacGen is acquired in September 2014;
- > Spot and contract wholesale prices are materially the same as those implied by the forward curves;
- > Generation volumes and plant availability are consistent with prior years and there are no material unplanned plant outages;
- > A zero carbon price;
- > AGL raises approximately \$1,232 million under an Equity Offer;
- > AGL raises approximately \$350 million of debt;
- > Based upon a Theoretical Ex-Rights Price (TERP) adjusted EPS calculation; and
- > Depreciation is based upon the property, plant and equipment balance per the Pro forma Acquisition Balance Sheet set out on slide 30.

Pro forma adjustments

78

The Pro forma Adjustments in preparation of the Pro forma AGL Combined Balance Sheet, are summarised below:

(a) Pro forma Acquisition Adjustments

The Pro Forma Acquisition Adjustments assume a purchase consideration of \$1,505 million. In accordance with AASB 3 Business Combinations, the fair value of derivative contracts held between AGL and MacGen has been eliminated and the associated hedge reserve of \$29 million after tax has been recycled to the income statement. The adjustment to retained earnings of \$147 million reflects the post tax impact of the elimination of the hedge contracts, including the recycled hedge reserve as discussed above as well as the significant items on acquisition as detailed in slide 31.

(b) Pro forma Funding Adjustments

The equity offer is expected to raise gross proceeds of \$1,232 million.

Transaction costs directly attributable to the Equity Offer of \$19 million (before tax) have been offset against the equity raised.

The debt issuance is expected to raise gross proceeds of \$350 million.

Transaction costs directly attributable to the Debt Issuance of \$1 million (before tax) have been offset against the debt raised.

ASX & Media Release

AGL acquires Macquarie Generation assets **AGL announces \$1,232 million 1 for 5 pro rata** **accelerated renounceable entitlement offer** **20 August 2014**

AGL Energy Limited (**AGL**) announced today that it had concluded an agreement with the New South Wales (**NSW**) Government to acquire the Macquarie Generation assets (**MacGen**) for a consideration of \$1,505 million¹ and that it is seeking to raise approximately \$1,232 million from a fully underwritten 1 for 5 pro rata accelerated renounceable entitlement offer with retail entitlements trading (**Entitlement Offer**).

The key details of the Entitlement Offer are:

- Fully underwritten 1 for 5 pro rata accelerated renounceable entitlement offer with retail entitlements trading to raise approximately \$1,232 million
- Offer price of \$11.00 per new share
- Institutional Entitlement Offer is accelerated
- Retail entitlements may be traded on ASX from Monday, 25 August 2014 to Monday, 8 September 2014
- New shares will not be entitled to the FY14 final dividend of 33 cents per share announced today with the FY14 financial results.

The offer price of \$11.00 per new share represents:

- a 23.3% discount to last close²; and
- a 20.2% discount to the theoretical ex-rights price (**TERP**)³.

The proceeds of the Entitlement Offer will be used to fund part of the \$1,505 million purchase price of the MacGen assets. The balance of the consideration will be funded by bank debt. AGL anticipates that, upon completion of funding, its credit rating will be reaffirmed.

MacGen assets

The MacGen power stations give AGL ownership of the lowest cost, large-scale baseload generators in NSW and increase AGL's registered generation capacity by approximately 82 percent to more than 10,400 MW. This brings AGL's share of generating capacity in the National Electricity Market to approximately 21 percent and adds to AGL's diverse portfolio of renewable and thermal generation assets.

AGL's CEO and Managing Director, Michael Fraser said: "We're delighted that we can finally proceed with the acquisition of MacGen.

"With Loy Yang in Victoria and MacGen in New South Wales, AGL will now generate electricity from two of the lowest cost baseload generators in the National Electricity Market."

The acquisition is expected to be accretive to underlying EPS for the year ending 30 June 2015⁴ and to generate substantial future cash flows for AGL.

Entitlement Offer

The Entitlement Offer comprises an accelerated institutional entitlement offer and a retail entitlement offer that includes the ability to trade retail entitlements on the ASX.

Under the Entitlement Offer, eligible shareholders are invited to subscribe for 1 new AGL ordinary share (**New Shares**) for every 5 existing AGL ordinary shares (**Entitlement**) held as at 7.00pm (Sydney time) on Monday, 25 August 2014 (**Record Date**).

New Shares issued under the Entitlement Offer will rank equally with existing Shares from the date of allotment. The first dividend payable in respect of the New Shares will be the interim dividend for FY15 which is expected to be announced in February 2015. New Shares to be issued under the Entitlement Offer will not be entitled to the FY14 final dividend of 33 cents per share announced on 20 August 2014.

Institutional Entitlement Offer

Eligible institutional shareholders will be invited to participate in the institutional entitlement offer which will take place from Wednesday, 20 August 2014 to Thursday, 21 August 2014 (**Institutional Entitlement Offer**).

Eligible institutional shareholders can choose to take up all, part or none of their Entitlement.

Institutional entitlements cannot be traded on the ASX. Institutional entitlements that eligible institutional shareholders do not take up by the close of the Institutional Entitlement Offer, and institutional entitlements that would otherwise have been offered to ineligible institutional shareholders, will be sold through an institutional shortfall bookbuild on Friday, 22 August 2014 (**Institutional Shortfall Bookbuild**). Any proceeds from the sale of institutional Entitlements under the Institutional Shortfall Bookbuild will be remitted proportionally to those institutional shareholders, less any applicable withholding tax. There is no guarantee that there will be any proceeds remitted to those institutional shareholders.

AGL shares have been placed in trading halt whilst the Institutional Entitlement Offer and Institutional Shortfall Bookbuild is undertaken.

Retail Entitlement Offer

Eligible retail shareholders will be invited to participate in the Retail Entitlement Offer at the same offer price and offer ratio as the Institutional Entitlement Offer (**Retail Entitlement Offer**). The Retail Entitlement Offer will open on Tuesday, 26 August 2014 and close at 5.00pm (Sydney time) on Monday, 15 September 2014.

Eligible retail shareholders will be allotted Entitlements which can be traded on the ASX. If they do not wish to take up all or part of their Entitlements, they can seek to sell all or part of their Entitlements on the ASX or by transferring it directly to another person to realise value for those Entitlements ahead of the Retail Shortfall Bookbuild. Retail Entitlements can be traded on the ASX from Monday, 25 August 2014 (on a deferred settlement basis) to Monday, 8 September 2014.

Retail Entitlements which are not taken up by eligible retail shareholders by the close of the Retail Entitlement Offer and Entitlements that would otherwise have been offered to ineligible retail shareholders will be sold through the Retail Shortfall Bookbuild on Thursday, 18 September 2014 (**Retail Shortfall Bookbuild**). Any proceeds from the sale of Entitlements under the Retail Shortfall Bookbuild will be remitted proportionally to those retail shareholders, less any applicable withholding tax. There is no guarantee that there will be any proceeds remitted to those retail shareholders.

Eligible retail shareholders wishing to participate in the Retail Entitlement Offer should carefully read the retail offer booklet and an accompanying personalised entitlement and acceptance form which are expected to be despatched on Friday, 29 August 2014. Copies of the retail offer booklet will be available on the ASX website and our website at www.aql.com.au from Monday, 25 August 2014.

The Entitlements may only be exercised by eligible retail shareholders, persons with a registered address in Australia or New Zealand and certain categories of investors in Canada (Ontario and Quebec), Denmark, France, Germany, Hong Kong, Ireland, Italy, Japan, the Netherlands, Norway, Singapore, Sweden, Switzerland and the United Kingdom. In addition, Entitlements may only be purchased by persons meeting certain eligibility criteria that are set out in the Appendix to the investor presentation which AGL has filed with the ASX today. In particular, persons in the United States and persons acting for the account or benefit of a person in the United States will not be eligible to purchase or trade Entitlements on the ASX or exercise Entitlements purchased on the ASX or transferred directly from another person.

It is the responsibility of purchasers of Entitlements to inform themselves of the eligibility criteria for exercise. If holders of Entitlements after the end of the trading period do not meet the eligibility criteria, they will not be able to exercise the Entitlements. If holders are not able to take up their Entitlements, those Entitlements will be sold into the retail shortfall bookbuild and holders may receive no value for them.

Notes:

1. Includes stamp duty but not other transaction costs of \$43 million.
2. As at close Tuesday, 19 August 2014 adjusted for the FY14 final dividend of 33 cents.
3. TERP is the theoretical price at which AGL Shares should trade immediately after the ex-date for the Entitlement Offer. TERP is a theoretical calculation only and the actual price at which AGL Shares trade immediately after the ex-date for the Entitlement Offer will depend on many factors and may not be equal to TERP. TERP is calculated by reference to AGL's closing price on 19 August 2014 and excludes the FY14 final dividend of 33 cents per share announced on 20 August 2014.
4. EPS accretion in FY15 is based on the following key assumptions:
 - > MacGen is acquired in September 2014;
 - > Spot and contract wholesale prices are materially the same as those implied by the forward curves;
 - > Generation volumes and plant availability are consistent with prior years and there are no material unplanned plant outages;
 - > A zero carbon price;
 - > AGL raises approximately \$1.2 billion under the Offer; and
 - > AGL raises approximately \$350 million of debt.
 - > Based on a Theoretical Ex-Rights Price (TERP) adjusted EPS calculation

ASX & Media Release

AGL successfully completes the institutional component of its 1 for 5 pro rata accelerated renounceable entitlement offer

25 August 2014

AGL Energy Limited (**AGL**) today announced the completion of the institutional component of its fully underwritten 1 for 5 pro rata accelerated renounceable entitlement offer (**Institutional Entitlement Offer**) with retail entitlements trading of new ordinary shares (**New Shares**) raising gross proceeds of approximately \$515 million.

Summary of the Institutional Entitlement Offer

- > **Institutional Entitlement Offer completed raising gross proceeds of approximately \$515 million**
- > **Approximately 95% take-up by eligible institutional shareholders**

Entitlements not taken up by eligible institutional shareholders and entitlements of ineligible institutional shareholders were sold and cleared in the institutional shortfall bookbuild at \$2.85 per entitlement. The clearing price equates to a \$2.85 premium to the offer price of \$11.00, and a 6 cent premium to TERP of \$13.79¹.

The close of the Institutional Entitlement Offer represents completion of the first stage of AGL's approximate \$1,232 million equity raising, announced on Wednesday, 20 August 2014. Proceeds of the Entitlement Offer will be used to fund part of the \$1,505 million purchase price of the Macquarie Generation assets.

Approximately 95% of the New Shares available under the Institutional Entitlement Offer were taken up, demonstrating strong demand from AGL's eligible institutional shareholders.

AGL CEO and Managing Director, Michael Fraser, said: "We are very pleased with the strong level of support received from our institutional shareholders in the Institutional Entitlement Offer. We now look forward to completing the retail component of the offer and completing the Macquarie Generation acquisition."

Approximately 2.3 million entitlements were available in the institutional shortfall bookbuild, which was completed on Friday, 22 August 2014. The bookbuild was well supported by shareholders and new investors with a clearing price of \$2.85 per entitlement. Accordingly, the total amount to be paid by successful participants in the institutional shortfall bookbuild is \$13.85 per New Share (being the offer price of \$11.00 per share, plus \$2.85 per entitlement). Eligible institutional shareholders who elected not to take up their entitlements, and ineligible institutional shareholders, will receive \$2.85 for each entitlement not taken up and sold into the institutional shortfall bookbuild.

¹TERP is the theoretical price at which AGL Shares should trade immediately after the ex-date for the Entitlement Offer. TERP is a theoretical calculation only and the actual price at which AGL Shares trade immediately after the ex-date for the Entitlement Offer will depend on many factors and may not be equal to TERP. TERP is calculated by reference to AGL's closing price on 19 August 2014 and excludes the FY14 final dividend of 33 cents per share announced on 20 August 2014.

New Shares taken up under the Institutional Entitlement Offer and following the institutional shortfall bookbuild are expected to be issued on Tuesday, 2 September 2014 and commence trading on ASX on the same day.

New Shares issued under the Institutional Entitlement Offer and Retail Entitlement Offer will rank equally with existing Shares from the date of allotment. New Shares to be issued under the Entitlement Offer will not be entitled to the FY14 fully franked final dividend of 33 cents per share announced on 20 August 2014.

Retail Entitlement Offer

The retail component of the entitlement offer (**Retail Entitlement Offer**) is expected to raise approximately \$717 million. The Retail Entitlement Offer will open on Tuesday, 26 August 2014 and close at 5.00pm (Sydney time) on Monday, 15 September 2014.

Eligible retail shareholders will be able to subscribe for 1 New Share for every 5 existing AGL ordinary shares (**Entitlement**) held on the record date of 7.00pm (Sydney time) Friday, 25 August 2014, at the same offer price of \$11.00 per share as the Institutional Entitlement Offer.

Eligible retail shareholders will be allotted Entitlements which can be traded on the ASX. If they do not wish to take up all or part of their Entitlements, they can seek to sell all or part of their Entitlements on the ASX or by transferring them directly to another person to realise value for those Entitlements ahead of the retail shortfall bookbuild. Retail Entitlements can be traded on the ASX from Monday, 25 August 2014 to Friday, 29 August 2014 on a deferred settlement basis and from Monday, 1 September 2014 to Monday, 8 September 2014 on a normal settlement basis.

Retail Entitlements that are not taken up by eligible retail shareholders by the close of the Retail Entitlement Offer and Entitlements that would otherwise have been offered to ineligible retail shareholders will be sold through the Retail Shortfall Bookbuild on Thursday, 18 September 2014 (**Retail Shortfall Bookbuild**).

Any proceeds from the sale of Entitlements under the Retail Shortfall Bookbuild will be remitted proportionally to those retail shareholders, less any applicable withholding tax. There is no guarantee that there will be any proceeds remitted to those retail shareholders.

Eligible retail shareholders wishing to participate in the Retail Entitlement Offer should carefully read the retail offer booklet and an accompanying personalised entitlement and acceptance form which are expected to be despatched on Friday, 29 August 2014. Copies of the retail offer booklet will be available on the ASX website and our website at agl.com.au from Monday, 25 August 2014.

The retail Entitlements may only be exercised by eligible retail shareholders, persons with a registered address in Australia or New Zealand and certain categories of investors in Canada (Ontario and Quebec), Denmark, France, Germany, Hong Kong, Ireland, Italy, Japan, the Netherlands, Norway, Singapore, Sweden, Switzerland and the United Kingdom, on the register as at the record date. In addition, Entitlements may only be purchased by persons meeting certain eligibility criteria that are set out in the Appendix to the investor presentation which AGL has filed with the ASX on Wednesday, 20 August 2014. In particular, persons in the United States and persons acting for the account or benefit of a person in the United States will not be eligible to purchase or trade Entitlements on the ASX or exercise Entitlements purchased on the ASX or transferred directly from another person.

It is the responsibility of purchasers of Entitlements to inform themselves of the eligibility criteria for exercise of Entitlements. If holders of Entitlements after the end of the trading period do not meet the eligibility criteria, they will not be able to exercise the Entitlements. If holders are not able to take up their Entitlements, those Entitlements will be sold into the Retail Shortfall Bookbuild and holders may receive no value for them.

AGL ordinary shares are expected to resume trading on the ASX from market open today on an ex-offer entitlement basis. AGL ordinary shares will commence trading ex-dividend of 33 cents per share on Tuesday, 2 September 2014.

No party other than AGL has authorised or caused the issue of this Information, or takes any responsibility for, or makes, any statements, representations or undertakings in this Information.

This Information is important and requires your immediate attention.

You should read this Information carefully and in its entirety before deciding how to deal with your Entitlement. In particular, you should consider the risk factors outlined in the 'Key Risks' section of the AGL Investor Presentation included in Section 5 of this Retail Offer Booklet, any of which could affect the operating and financial performance of AGL or the value of an investment in AGL.

You should consult your stockbroker, accountant or other professional adviser to evaluate whether or not to participate in the Retail Entitlement Offer.

Trading of Entitlements and New Shares

It is expected that trading of Retail Entitlements on ASX will commence at 10.00am (Sydney time) on Monday, 25 August 2014 on a deferred settlement basis until 4.00pm (Sydney time) on Friday, 29 August 2014 (when those Entitlements are expected to be allotted) and from 10.00am (Sydney time) on Monday, 1 September 2014 until 4.00pm (Sydney time) on Monday, 8 September 2014 on a normal settlement basis. Following this, it is expected that trading on ASX of New Shares to be issued under the Retail Entitlement Offer will commence at 10.00am (Sydney time) on Tuesday, 9 September 2014 on a deferred settlement basis until 4.00pm (Sydney time) on Thursday, 25 September 2014 (when New Shares are expected to be issued) and thereafter on a normal settlement basis.

AGL will have no responsibility and disclaims all liability (to the maximum extent permitted by law) to persons who trade Entitlements before they receive their personalised Entitlement and Acceptance Form, whether on the basis of confirmation of the allocation provided by AGL or the AGL Share Registry or otherwise or who otherwise trade or purport to trade Entitlements in error or which they do not hold or are not entitled to.

AGL will have no responsibility and disclaims all liability (to the maximum extent permitted by law) to persons who trade New Shares they believe will be issued to them before they receive their holding statements, whether on the basis of confirmation of the allocation provided by AGL or the AGL Share Registry or otherwise or who otherwise trade or purport to trade Entitlements in error or which they do not hold or are not entitled to.

If you are in any doubt as to these matters, you should first consult with your stockbroker or other professional adviser.

6.1 Eligible Retail Shareholders

This Information contains an offer of New Shares to Eligible Retail Shareholders in Australia or New Zealand and has been prepared in accordance with section 708AA of the Corporations Act as notionally modified by ASIC.

Eligible Retail Shareholders are those persons who:

- > are registered as a holder of Shares as at the Record Date, being 7.00pm (Sydney time) on Monday, 25 August 2014;
- > have a registered address on the AGL share register in Australia or New Zealand;
- > are not in the United States and are not acting for the account or benefit of a person in the United States (to the extent such person holds AGL ordinary shares for the account or benefit of such person in the United States);
- > were not invited to participate (other than as nominee, in respect of other underlying holdings) under the Institutional Entitlement Offer, and were not treated as an ineligible institutional shareholder under the Institutional Entitlement Offer; and
- > are eligible under all applicable securities laws to receive an offer under the Retail Entitlement Offer.

Retail Shareholders who are not Eligible Retail Shareholders are Ineligible Retail Shareholders. AGL reserves the right to determine whether a shareholder is an Eligible Retail Shareholder or an Ineligible Retail Shareholder.

By returning a completed personalised Entitlement and Acceptance Form or making a payment by Bpay®, you will be taken to have represented and warranted that you satisfy each of the criteria listed above to be an Eligible Retail Shareholder. Nominees, trustees or custodians are therefore advised to seek independent professional advice as to how to proceed.

AGL may (in its absolute discretion) extend the Retail Entitlement Offer to any institutional shareholder that was eligible to participate in the Institutional Entitlement Offer but was not invited to participate in the Institutional Entitlement Offer (subject to compliance with relevant laws).

AGL has decided that it is unreasonable to make offers under the Retail Entitlement Offer to shareholders who have registered addresses outside Australia and New Zealand, having regard to the number of such holders in those places and the number and value of the New Shares that they would be offered, and the cost of complying with the relevant legal and regulatory requirements in those places. AGL may (in its absolute discretion) extend the Retail Entitlement Offer to shareholders who have registered addresses outside Australia and New Zealand (except the United States) in accordance with applicable law.

6.2 Eligible Institutional Shareholders

Eligible Institutional Shareholders are institutional shareholders to whom the Underwriters made an offer on behalf of AGL under the Institutional Entitlement Offer.

6.3 Ranking of New Shares

New Shares issued under the Retail Entitlement Offer will be fully paid and rank equally in all respects with existing Shares and will be entitled to dividends on the same basis as existing Shares, starting with the 2015 interim dividend. New Shares to be issued under the Offer will not be entitled to the 2014 final dividend announced on 20 August 2014. The rights and liabilities attaching to the New Shares are set out in AGL's constitution, a copy of which is available at www.agl.com.au.

6.4 Risks

The Investor Presentation details important factors and risks that could affect the financial and operating performance of AGL. You should refer to the 'Key Risks' section of the Investor Presentation released to ASX on 20 August 2014 which is included in Section 5 of this Retail Offer Booklet. You should consider these factors in light of your personal circumstances, including financial and taxation issues, before making a decision in relation to your Entitlement.

6.5 Reconciliation, Top-Up Shares and the rights of AGL and the Underwriters

The Entitlement Offer is a complex process and in some instances investors may believe that they will own more Shares than they ultimately did as at the Record Date or are otherwise entitled to more New Shares than initially offered to them. In addition, where trustees of AGL's employee share plans hold shares on behalf of participants in those plans, the number of New Shares that are offered may need to increase to take account of the rounding referred to in Section 6.8. These matters may result in a need for reconciliation. If reconciliation is required, it is possible that AGL may need to issue additional New Shares (**Top-Up Shares**) to ensure that the relevant investors receive their appropriate allocation of New Shares. The price at which these Top-Up Shares would be issued is not known.

AGL also reserves the right to reduce the size of an Entitlement or number of New Shares or the amount of the Institutional Premium or Retail Premium allocated to Eligible Institutional Shareholders or Eligible Retail Shareholders, or persons claiming to be Eligible Institutional Shareholders or Eligible Retail Shareholders or other applicable investors, if AGL believes in its complete discretion that their claims are overstated or if they or their nominees fail to provide information requested to substantiate their claims. In that case, AGL may, in its discretion, require the relevant shareholder to transfer excess New Shares to the Underwriters at the Offer Price per New Share. If necessary, the relevant shareholder may need to transfer existing Shares held by them or to purchase additional Shares on-market to meet this obligation. The relevant shareholder will bear any and all losses caused by subscribing for New Shares in excess of their Entitlement and any actions they are required to take in this regard.

Investors who sell Entitlements to which they are not entitled, or who do not hold sufficient Entitlements at the time required to deliver those Entitlements, may be required by AGL to otherwise acquire Entitlements or Shares to satisfy these obligations.

By applying under the Entitlement Offer, including pursuant to acquisitions of Entitlements, those doing so irrevocably acknowledge and agree to do the above as required by AGL in its absolute discretion. Those applying acknowledge that there is no time limit on the ability of AGL or the Underwriters to require any of the actions set out above.

6.6 Receipt of excess Retail Premium

If you receive a Retail Premium payment in excess of the Retail Premium payment to which you were actually entitled based on that part of your Entitlement under the Retail Entitlement Offer which remains held by you as at close of the Retail Entitlement Offer on 5.00pm (Sydney time) on Monday, 15 September 2014, then, in the absolute discretion of AGL, you may be required to repay AGL the excess Retail Premium.

By taking up or transferring your Entitlement, or accepting the payment to you of a Retail Premium, you irrevocably acknowledge and agree to repay any excess payment of the Retail Premium as set out above as required by AGL in its absolute discretion. In this case the amount required to be repaid will be net of any applicable withholding tax. You also acknowledge that there is no time limit on the ability of AGL to require repayment as set out above and that where AGL exercises its right to correct your Entitlement, you are treated as continuing to have taken up, transferred or not taken up any remaining part of the Entitlement.

6.7 No cooling off rights

Cooling off rights do not apply to an investment in New Shares. You cannot withdraw your application once it has been accepted.

6.8 Rounding of Entitlements

Where fractions arise in the calculation of an Entitlement, they will be rounded up to the nearest whole number of New Shares.

6.9 Trading of Retail Entitlements

Entitlements under the Retail Entitlement Offer are tradeable and can be sold or transferred. They are expected to be quoted on and tradeable on ASX from Monday, 25 August 2014 to Monday, 8 September 2014. You may sell your Entitlements (which you do not wish to take up or let be sold into the Retail Shortfall Bookbuild) in order to realise value which may attach to those Entitlements if sold at that time. If you let your Entitlement be sold into the Retail Shortfall Bookbuild, you have the opportunity to receive any Retail Premium (see Section 3.3). There is no guarantee that there will be a liquid market in traded Entitlements. A lack of liquidity may impact the ability to sell Entitlements on ASX and the price able to be achieved.

Prices obtainable for Retail Entitlements may rise and fall over the Retail Entitlement trading period and will depend on many factors including the demand for and supply of Entitlements on ASX and the value of AGL existing Shares relative to the Offer Price. If you sell your Entitlement, you may receive a higher or lower amount than a shareholder who sells their Entitlement at a different time in the Retail Entitlement trading period or through the Retail Shortfall Bookbuild.

If you decide not to take up all or part of your Entitlement, you should consider whether to sell all or part of your Entitlement or allow all or part of it to be sold into the Retail Shortfall Bookbuild. Information on how Entitlements may be sold or transferred is set out in Section 3 and information on Australian taxation considerations is set out in Section 4.

Institutional Entitlements under the Institutional Entitlement Offer were not quoted on or tradeable on ASX nor privately transferable.

The Retail Entitlements may not be purchased, traded, taken up or exercised by persons in the United States or by persons who are acting for the account or benefit of persons in the United States.

Investors should note that if you purchase Retail Entitlements on ASX or otherwise, in order to take up or exercise those Retail Entitlements and subscribe for New Shares you:

- > must be an Eligible Retail Shareholder, a resident in Australia or New Zealand, or otherwise qualify as an 'Eligible Person'⁶; and
- > must not be in the United States or acting for the account or benefit of a person in the United States.

If you do not satisfy the above conditions, you will not be entitled to take up Retail Entitlements or subscribe for New Shares.

It is the responsibility of purchasers of Entitlements to inform themselves of the eligibility criteria for exercise. If holders of Entitlements after the end of the trading period do not meet the eligibility criteria, they will not be able to exercise the Entitlements. In the event that holders are not able to take up their Entitlements, they may receive no value for them.

6.10 Notice to nominees and custodians

If AGL believes you hold Shares as a nominee or custodian you will have received, or will shortly receive, a letter in respect of the Entitlement Offer. Nominees and custodians should consider carefully the contents of that letter and note in particular that the Retail Entitlement Offer is not available to, and they must not sell or transfer Entitlements in respect of or purport to accept the Retail Entitlement Offer in respect of, Eligible Institutional Shareholders who were invited to participate in the Institutional Entitlement Offer (whether they accepted their Entitlement or not) and Institutional Shareholders who were treated as ineligible institutional shareholders under the Institutional Entitlement Offer.

Persons acting as nominees for other persons must not take up any Entitlements on behalf of, or send any documents related to the Retail Entitlement Offer to, any person in the United States or any person that is acting for the account or benefit of a person in the United States. Persons in the United States and persons acting for the account or benefit of persons in the United States will not be able to purchase or trade Retail Entitlements on ASX or otherwise, or take up or exercise Retail Entitlements purchased on ASX or otherwise and may receive no value for any such Entitlements held.

AGL is not required to determine whether or not any registered holder or investor is acting as a nominee or custodian or the identity or residence of any beneficial owners of existing Shares or Entitlements. None of the Underwriters nor any of their respective related bodies corporate and affiliates, nor any of their respective directors, officers, partners, employees, representatives or agents have authorised or caused the issue of this Information and they do not take any responsibility for this Information or any action taken by you on the basis of such information. To the maximum extent permitted by law, the Underwriters and each of their respective related bodies corporate and affiliates and each of their respective directors, officers, partners, employees, representatives or agents exclude and disclaim all liability for any expenses, losses, damages or costs incurred by you as a result of your participation in the Entitlement Offer and this Information being inaccurate or incomplete in any way for any reason, whether by negligence or otherwise. AGL will arrange for Entitlements which are not taken up by close of the Retail Entitlement Offer to be sold to eligible institutional investors. AGL has engaged the Underwriters to assist in selling Entitlements to subscribe for New Shares (including Entitlements that would have been issued to Ineligible Retail Shareholders had they been eligible to participate in the Retail Entitlement Offer), through the Retail Shortfall Bookbuild. However, it is important to note that Underwriters will be acting for and providing services to AGL in this process and will not be acting for or providing services to shareholders or any other investor. The engagement of the Underwriters by AGL is not intended to create any agency, fiduciary or other relationship between the Underwriters and the shareholders or any other investor.

AGL reserves the right to withdraw all or part of the Entitlement Offer and this Information at any time, subject to applicable laws, in which case AGL will refund Application Monies in relation to New Shares not already issued in accordance with the Corporations Act and without payment of interest. In circumstances where allotment under the Institutional Entitlement Offer has occurred, AGL may only be able to withdraw the Entitlement Offer with respect to New Shares to be issued under the Retail Entitlement Offer.
