

How to get started on the **nbn**™ network with AGL.

First, check what's in the box.

Check you have each of these ready:

- ✓ Modem
- ✓ Modem power cord
- ✓ Ethernet cable
- ✓ Telephone cable

Once your **nbn** connection is confirmed, we'll send you an email letting you know it's time to complete the set-up of your modem.

nbn™, nbn co and other nbn™ logos and brands are trademarks of nbn co limited and used under licence.

Now it's time to connect your modem.

Step 1

Connect the modem power cord into the back of the modem and into your power point. Turn the power on at the power point.

Step 2

Push the on/off button on the back of the modem.

Step 3

Then connect one end of the telephone cable to the DSL port on the back of your modem. Connect the other end to your phone socket.

Note: **nbn** tends to activate one phone line within a property, so you may need to try several before you find the correct one. You'll know you've found the right one when the internet light is green, this can take 2-3 minutes.

Step 4

Connect your home phone to the port labelled Phone on the back of your modem.

You'll only be able to connect your phone if your plan includes an **nbn** home phone service.

Step 5

Time to get connected.

To connect a WiFi device, you'll need the **WiFi Network Name** and the **WiFi Password** that is on the base of your modem.
