

Join Australia's award-winning Virtual Power Plant.

Share your solar battery's power and we'll reward you with \$1,000 off the purchase price of your solar battery.*

* This offer is only available to eligible customers who sign up through selected installer partners and have an eligible solar battery installed. Offer may be subject to change or expiry without notice. A maximum of one battery can be connected to the VPP per premises. Exit fees, eligibility criteria and T&Cs apply. Learn more at [agl.com.au/joinvpp](https://www.agl.com.au/joinvpp)

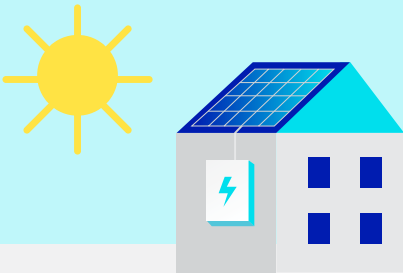

Our Virtual Power Plant.

At AGL, we're helping customers find new ways to participate in our transition to renewable energy. By joining our **Virtual Power Plant** you'll become part of a growing network of solar batteries helping to create a cleaner energy future, and we'll reward you with \$1,000 off the cost of your solar battery or solar battery bundle.

If you're eligible, all you'll need to do is agree to connect your compatible solar battery to our VPP for five years and have an electricity account with us.

How does it work?

Your panels convert sun into electricity.

Electricity gets stored in your battery, which supplies energy to your home even after dark, reducing need for grid power.

We'll manage your solar battery remotely based on the best way we can take pressure off the grid. But you'll always have enough energy stored to power your home.

By joining AGL's VPP you'll receive \$1,000 off the purchase price of your battery. Just sign up through selected installer partners, connect to our VPP for five years and sign up to an AGL electricity plan. An early termination fee will apply if you leave the VPP or cancel your electricity plan before 5 years.

What's a Virtual Power Plant?

A Virtual Power Plant, or VPP for short, is a network of connected solar batteries that work together like a pop-up power plant. Intelligently controlled, they can provide a large bank of solar energy that helps support the electricity grid. Occasionally AGL will manage your solar battery remotely, but we'll always ensure you have enough stored energy to power your home first. Join us in shaping a greener, more sustainable future with our VPP. Discover more about the benefits of the VPP [here](#).

Track your power and VPP activity 24/7

Easily track your solar and battery systems' performance and VPP activity with the AGL Energy App or [My Account](#).

Why sign-up to our Virtual Power Plant?

Our VPP supports the community and delivers you value, control and flexibility.

Get rewarded

Get \$1,000 off the cost of a compatible solar battery or solar battery bundle when you join our VPP for five years through selected installer partners. Please note, a pro-rated early termination fee will apply if you leave before the end of the five-year term.

Help the environment

On top of supporting your community, you'll be helping to build a cleaner, more reliable energy system for the future. That's better for the environment, and better for you.

Flexible Payment Options

You can buy a solar battery or solar battery bundle outright or you can opt for interest-free finance with \$0 deposit through our finance partner, Plenti.[^]

Bill Impact Guarantee

We occasionally manage your solar battery remotely, making sure that you always have enough energy for your home. We'll never discharge the battery below 20% capacity, which may result in small bill increases, but never more than \$50 (GST incl.) per year. If the estimated impact is higher at the end of each 12-month period, we'll credit you the difference.*

Ongoing Bill Credits and Energy Plan Freedom

Enjoy ongoing bill credits after the initial five-year term and, since there's no lock-in contracts, you're free to switch energy plans. To stay connected to our VPP, you'll just need to remain on an AGL electricity plan.

[^]This offer is only available to eligible customers who sign up through Plenti's finance portal and have a compatible solar battery installed. Offer may be subject to change or expiry without notice. Exit fees, eligibility criteria and T&Cs apply. Plenti receives a commission for each approved finance application.

* Excludes customers with energy plans including a 'demand charge' component or customers with inverters set to a 'time-based control', 'demand charge management' or 'backup only functionality' operating mode.

Am I eligible?

We'd love you to join our VPP if you meet the eligibility criteria, including if you:

- Have an electricity plan with us or are ready to make the switch to AGL. You can sign up or view our electricity plans [online here](#).
- Are living in NSW, QLD or VIC
- Are purchasing a compatible solar battery*
- Have or are purchasing a compatible operating solar system, and a reliable and ongoing internet connection via Ethernet or Wi-Fi
- Are not already part of a Virtual Power Plant
- Have a smart meter installed at your premises or agree to have one installed

* Tesla Powerwall, Sungrow High Voltage Battery, SolarEdge Energy Bank or LG Home Battery with a compatible SolarEdge inverter.

Ready to join?

1 Find out more

Speak to your solar battery installer regarding your quote.

2 Sign up to the VPP

If you meet the eligibility criteria and once you've signed a contract with your installer, you'll need to accept the terms and conditions (T&Cs) of AGL's VPP and sign up to an AGL electricity account if you don't already have one.

3 Solar battery installation and VPP testing

Once your new solar battery is installed, we'll do an initial check to make sure it can connect to the VPP and that you meet the eligibility requirements.

Note, this process can take up to six weeks.

4 Your VPP service is ready to start

Once we confirm your eligibility, complete VPP testing and you're signed up to an electricity plan, your service will begin. We'll email you a final confirmation along with a copy of the terms and conditions, for your records.

5 Get \$1,000 off

Once your VPP connection has been confirmed, \$1,000 will be deducted from the cost of your solar battery or solar system.
